

Street, Alexandria, Louisiana 71302; telephone (318) 473-7751.

**SUPPLEMENTARY INFORMATION:** The environmental assessment of the federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Donald W. Gohmert, State Conservationist, has determined that preparation and review of an environmental impact statement is not needed for this project.

The project will promote better utilization of available freshwater and nutrients from the Mississippi River, via the Caernarvon Diversion, for the maintenance of project area marshes. Benefits will include increasing freshwater retention time and allowing river water dispersion into interior marshes during periods of low diversion discharges from the Caernarvon Diversion Structure. This will reduce saltwater intrusion and salinity variation within the project area. The project is expected to protect and enhance existing marshes, increase the occurrence of emergent and submergent marsh vegetation, and improve fish and wildlife habitat on 18,200 acres of intermediate marsh and shallow open water bodies.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data collected during the environmental assessment are on file and may be reviewed by contacting Donald W. Gohmert.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.
