

entitled "Setting Priorities for Land Conservation," the committee affirmed the need for criteria by stating, "Each agency should develop individual criteria to rank its own acquisitions, because no single set of criteria will work to satisfy fully the different agency missions." The interim criteria implement the National Wildlife Refuge System Improvement Act of 1997, which states, "the Mission of the System is to administer a national network of lands and waters for the conservation, management, and where appropriate, restoration of the fish, wildlife, and plant resources and their habitat within the United States for the benefit of present and future generations of Americans."

Interim Land Acquisition Priority System Criteria

The purpose of the Land Acquisition Priority System is: (1) To document land acquisition needs and opportunities for the Fish and Wildlife Service nationwide; (2) to prioritize land acquisition projects submitted by our Regions; and (3) to serve as a starting point for the annual land acquisition budget request. The criteria are one of the "tools" that we use to build our annual land acquisition priorities among the most important habitat projects in the Nation. The criteria consist of four components: Fisheries and Aquatic Resources, Endangered and Threatened Species, Bird Conservation, and Ecosystem Conservation.

The Fisheries and Aquatic Resources Component addresses: (1) The status and trends of aquatic populations; (2) species diversity for trust resources; (3) critical habitats, including free-flowing rivers and watersheds; (4) wetland types and trend status; and (5) wetland losses by percent of historic wetland base by State.

The Endangered and Threatened Species Component is: (1) Recovery oriented; (2) considers habitat and biological community integrity as well as species occurrences; and (3) focuses on actual habitat use.

The Bird Conservation Component consists of: (1) Regionally developed lists of 70 species of management concern for each region as well as Hawaii and Puerto Rico; (2) a population importance index; and (3) an avian diversity index. We give emphasis to Nongame Species of Management Concern and the North American Wetlands Conservation Act Priority Waterfowl Species.

The Ecosystem Conservation Component addresses: (1) Biodiversity through distribution and abundance of rare communities; (2) ecosystem decline

and protection of native diversity of threatened ecosystems; (3) landscape conservation by preserving large, intact habitats through partnerships; and (4) contributions to national plans and designations.

Comment Solicitation

We seek public comments on this interim document and will take into consideration comments and additional information received during the comment period. Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the record, which we will honor to the extent allowable by law. If you wish for us to withhold your name and/or address, you must state this prominently at the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Authority

We issue this notice under the authority of the Land and Water Conservation Fund Act of 1995 as amended (16 U.S.C. 4601-4 *et seq.*) and the National Wildlife Refuge System Administration Act of 1966 as amended, (16 U.S.C. 668dd *et seq.*).

Notice of Emergency Off-Road Vehicle Closures in Wilderness Study Areas Located in the San Rafael Swell Region

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of a temporary emergency closure pursuant to regulations at 43 CFR 8341.2(a) to off-road vehicles (ORVs), also commonly referred to as off-highway vehicles

(OHVs), on public lands and existing vehicle ways within the boundaries of seven Wilderness Study Areas (WSAs).

SUMMARY: This notice closes public lands within the Muddy Creek, Sid's Mountain/Sid's Cabin, Devil's Canyon, Crack Canyon, San Rafael Reef, Horseshoe Canyon and Mexican Mountain WSAs, located in the San Rafael Swell region of central Utah, to motorized vehicles. An emergency closure order is necessary due to ORV-caused damage to soils, vegetation and other resources which is impairing wilderness values over extensive portions of the affected WSAs. The closure effects motorized vehicle use on all public lands in WSAs in the Price Field Office with the exception of "four" routes in Sid's Mountain WSA described as follows: (1) The wash bottom of Coal Wash, including the short dugway from the west which enters this wash, and North Fork Coal Wash south until it exits the WSA over "Fix-It-Pass", (2) the wash bottom of South Fork Coal Wash from its junction with the North Fork to and including the "Eva Conover" way, (3) the "Devil's Racetrack" way, and (4) the Justensen Flat access way, including lower Eagle Canyon southeast from the junction of this way. These routes will remain open on a conditional basis. This closure applies to all motor vehicle use with the exception of law enforcement and emergency personnel or administrative uses authorized by the BLM.

DATES: This emergency closure order is effective immediately and will remain in effect until adverse effects are eliminated and measures are implemented to prevent reoccurrence, as identified in 43 CFR 8341.2 (a). Should the rehabilitation work and non-impairment plan associated with Coal Wash, South Fork and North Fork of Coal Wash, the Eva Conover and Devil's Racetrack routes, the Justensen Flat access way and adjacent lands not result in abatement of adverse effects, the ways will be closed to motorized vehicle use. Authorities for the closure order are 43 CFR 8341.2(a).

FOR FURTHER INFORMATION CONTACT: Dick Manus, Price Field Office Manager, 125 South, 600 West, Price, Utah 84501. Telephone (435) 636-3600.

SUPPLEMENTARY INFORMATION: The establishment of WSAs in the San Rafael Swell region in 1980 placed lands under protective management as specified by the Interim Management Policy (IMP) for lands under wilderness review. Under the IMP, motor vehicle use could continue on existing vehicle ways as long as that use does not impair
