NUCLEAR REGULATORY COMMISSION
[Docket Nos. 50–245, 50–336, and 50–423]

Northeast Nuclear Energy Company, et al.; Millstone Nuclear Power Station, Units 1, 2, and 3; Notice of Consideration of Approval of Application Regarding Proposed Merger and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an order under 10 CFR 50.80 approving the indirect transfer of Facility Operating Licenses Nos. DPR–21, DPR–65 and NPF–49 for the Millstone Nuclear Power Station, Units 1, 2, and 3, (Unit 1, Unit 2, and Unit 3), respectively, to the extent held by Connecticut Light and Power Company (CL&P), Western Massachusetts Electric Company (WMECO), Northeast Nuclear Energy Company (NNECO), and Public Service Company of New Hampshire (PSNH). The indirect transfer would be to a new Consolidated Edison, Inc., incorporated in Delaware (New CEI), resulting from the planned merger of Consolidated Edison, Inc. (CEI), the current parent of Consolidated Edison Company of New York, Inc. (Con Ed), and Northeast Utilities (NU), the parent company of WMECO, CL&P, PSNH and NNECO.

As an alternative to requests for a hearing and petitions to intervene, by May 8, 2000, persons may submit written comments regarding the license transfer application, as provided for in 10 CFR 2.1305. The Commission will consider and, if appropriate, respond to these comments, but such comments will not otherwise constitute part of the decisional record. Comments should be submitted to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. Attention: Rulemakings and Adjudications Staff, and should cite the publication date and page number of the Federal Register and served on the parties to the hearing.

For further details with respect to this action, see the application dated January 13, 2000, by April 27, 2000, any person whose interest may be affected by the Commission’s action on the application may request a hearing, and, if not the applicants, may petition for leave to intervene in a hearing proceeding on the Commission’s action. Requests for a hearing and petitions for leave to intervene should be filed in accordance with the Commission’s rules of practice set forth in Subpart M, “Public Notification, Availability of Documents and Records, Hearing Requests and Procedures for Hearings on License Transfer Applications,” of 10 CFR Part 2.

For the Nuclear Regulatory Commission.

Robert M. Pulsifer,
Project Manager, Section 2, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

[Docket No. 040–08838]

Notice of Consideration of Amendment Request for U.S. Army Jefferson Proving Ground Site in Madison, IN and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of a license amendment to Materials License No. SUB–1435 issued to the U.S. Army (licensee) at the Jefferson Proving Ground (JPG) site in Madison, Indiana. The licensee requested, in a letter dated February 15, 2000, to: (1) Authorize transfer of licensing responsibilities for the Jefferson Proving Ground (JPG) site from the U.S. Army Test and Evaluation Command (TECOM) to the U.S. Army Soldier and Biological Chemical Command (SBCCOM), (2) designate Ms. Joyce E. Kuykendall as the Radiation Safety Officer (RSO) for the site, and (3) include the revised JPG Security Plan in the license.

From 1941 to 1994, the licensee conducted ordnance testing on the JPG site, and fired more than 24 million rounds of conventional explosive. From 1984 to 1994, the licensee conducted accuracy testing of depleted uranium (DU) tank penetrator rounds at the site. An NRC license was issued to authorize the U.S. Army to use, store, and perform testing of DU munitions at JPG. The DU penetrator rounds vary in size but can be generally described as rods comprised of a DU titanium alloy with a diameter of approximately 2.5 centimeters (cm) (1 inch) and a length as much as 61 cm (2 feet). The DU munitions testing contaminated approximately 5.1×10^4 square meters (m^2) (1260 acres) of the site with an estimated 7×10^4 kilograms (1.5×10^6 pounds) of DU. In accordance with the Defense Authorization Amendments and Base Realignment and Closure Act of 1998 (Public Law 100–256), the license was required to close the JPG base on September 30, 1995. Currently, the licensed material is kept onsite in the restricted area known as the “Depleted Uranium Impact Area.” This area is located north of the firing line, and consists of approximately 12×10^6 m^2 (3,000 acres).

An NRC administrative review, documented in a letter to the licensee dated March 15, 2000, found the license amendment application acceptable to begin a technical review. The application requested to: (1) Authorize transfer of licensing responsibilities for the JPG site from TECOM to SBCCOM, (2) designate Ms. Joyce E. Kuykendall as the RSO for the site, and (3) include the revised JPG Security Plan in the license. The NRC Decommissioning Branch is currently changing its policy regarding listing the RSO by name in the license. Instead, the license will include the qualifications that an RSO must meet for the respective site. NRC staff plans to revise the JPG license condition on the RSO accordingly.

If the NRC approves the February 15, 2000, request, the approval will be documented in an amendment to NRC License No. SUB–1435. However, before approving the proposed amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and NRC’s regulations. These findings will be documented in a Safety Evaluation Report and an Environmental Assessment or a Categorical Exclusion.

The request for a hearing must be filed with the Office of the Secretary either:

1. By delivery to Secretary, U.S. Nuclear Regulatory Commission, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852–2738, between 7:45 am and 4:15 pm Federal workdays; or

2. By mail, telegram, or facsimile addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

The request for a hearing must be served, by delivering it personally or by mail, to:

1. The applicant, U.S. Army Soldier and Biological Chemical Command, 5183 Black Hawk Road, Aberdeen Proving Ground, MD 21010–5424, Attention: Mr. John M. Ferriter, and;
2. The NRC staff, by delivery to the Executive Director for Operations, U.S. Nuclear Regulatory Commission, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852–2738, between 7:45 am and 4:15 pm Federal workdays, or by mail, addressed to the Executive Director for Operations, U.S.
