periodically where it becomes the official record.

Currently, more than half of the nation’s AmeriCorps programs use this system. The Corporation would like to have all programs use it, since it ultimately speeds up both collecting information and issuing education awards to members who have successfully completed their terms of service. However, many AmeriCorps programs, especially smaller ones, do not have the technological resources to afford the computer hardware and software.

The Corporation does not want to exclude any competent, otherwise qualified organizations from participating as a sponsor, so it is possible that there may always be a small number of organizations that will use forms. A separate discussion of each form follows.

A. Enrollment Form—(OMB #3045–0006)

Currently, AmeriCorps members use a form entitled Corporation for National Service Enrollment Form to enroll national service participants in the AmeriCorps program. The form requests program-related as well as demographic information. The program information includes the participant’s start date, the code number of the program, the expected completion date, and whether the term of service is full or part time. This is the Corporation’s sole source of data for individual members. The demographic information includes background information on the AmeriCorps member (including gender, marital status, education level, and reasons for joining).

The program information is used to:
- Make liability projections for the Trust Fund;
- Verify national service participation when requested by a lender who holds an AmeriCorps member’s student loan (members are eligible to have the repayment of certain student loans postponed if they are participating in national service);
- Plan and monitor programs (review recruiting efforts, identify programs with excessive early termination rates, establish and reconcile program’s budgets)

The demographic information is used for recruiting purposes and to provide the Corporation, program managers, and the Congress with demographic data on AmeriCorps members.

In requesting permission for renewal of this form, the Corporation does not propose making any changes to the version currently in use.

Type of Review: Renewal.

Estimated Total Burden Hours: 584 hours.
Total Burden Cost (capital/startup): None.
Total Burden Cost (operating/maintenance): None.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Thomas L. Bryant,
Acting General Counsel.

BILLING CODE 6050–28–U

DEPARTMENT OF DEFENSE

Department of the Army

Armed Forces Epidemiological Board (AFEB)

AGENCY: Office of the Surgeon General, DoD.

ACTION: Notice of partially-closed meeting.

SUMMARY: In accordance with section 10(a)(2) of Public Law 92–463, The Federal Advisory Committee Act, this announces the forthcoming AFEB meeting.

The meeting will be held from 0730–1600 on Tuesday, 30 May, and 0730–1300 on Wednesday, 31 May 2000. The purpose of the meeting is to address pending and new Board issues, provide briefings for Board members on topics related to ongoing and new Board issues conduct subcommittee meetings, conduct an executive working session, and to have a classified AFEB update on the DoD Immunization Program for Biological Warfare Defense in accordance with DoD Directive 6205.3. The meeting location will be at USAMRIID, Fort Detrick, Frederick, Maryland. This meeting will be open to the public on 30 May, but limited by space accommodations. The meeting will be closed to the public on 31 May in accordance with Section 552(b)(c) of Title 5, U.S.C., specifically subparagraph (1) thereof and Title 5, U.S.C., appendix 1, subsection 10(d).

Any interested person may attend, appear before or file statements with the committee at the time and in the manner permitted by the committee.

FOR FURTHER INFORMATION CONTACT: COL Benedict Diniega, AFEB Executive Secretary, Armed Forces Epidemiological Board, Skyline Six, 5100 Leseburg Pike, Room 682, Falls Church, Virginia 22041–3258, (703) 681–8012/4.

**Department of the Army**

**Announcement of Intent To Grant an Exclusive License for a U.S. Army-Owned Patent Application and All Patents Resulting Therefrom Worldwide, Including All Foreign Counterpart Applications**

**AGENCY:** Picatinny Arsenal, New Jersey, DoD.

**ACTION:** Notice.

**SUMMARY:** The Department of the Army announces that unless there is objection, in sixty days it will grant an Exclusive license to Bulova Technologies, L.L.C., 101 North Queen Street, Lancaster, Pennsylvania 17604-4787, on U.S. Army Patent Application serial number 09/511,641 filed on February 22, 2000, Army docket number DAR-63-99, announced February 25, 2000, Patent Application Number 60/844,478, entitled “Improved Self Destroy Fuze for Munitions” by Louis J. Adimari, and Joseph A. Donini, Keith R. Fulton, Marc E. Ball, Edward F. Cooper, John R. Hertzler, and John C. Yoo, together with an Intracavity Optical Parametric Oscillator. This is to announce that we are now seeking licensing partners for this technology, which has direct applications to military rangefinders as well as other commercial purposes. The design is exceptionally small and compact. There is a plan for initial procurement of rangefinders utilizing this laser which will be announced separately. Other uses of this device include: ophthalmology applications; due to the precision of the beam it may also lend itself to applications in computer chip processing; and applications in surveying instruments. Due to the numerous applications of this technology the NVESD invites companies to consider Cooperative Research and Development Agreements for developing applications of this technology to their product lines. A preliminary design review package and license application for the required patent is available from NVESD. If interested please request information and respond with the required documents within 30 days.

**FOR FURTHER INFORMATION CONTACT:**

**SUPPLEMENTARY INFORMATION:** None.

**Notice To Seek Licensing Partners for Pseudo-Monolithic Laser With an Intracavity Optical Parametric Oscillator**

**AGENCY:** U.S. Army, DoD.

**ACTION:** Notice of intent.

**SUMMARY:** The U.S. Army CERDEC’s Night Vision & Electronic Sensors Directorate (NVESD) has filed for a patent on a Pseudo-Monolithic Laser with an Intracavity Optical Parametric Oscillator. This is to announce that we are now seeking licensing partners for this technology, which has direct applications to military rangefinders as well as other commercial purposes. The laser was designed for simplicity and has no moving parts and few optical components. It can be tuned/ manufactured to laze at three discrete frequencies. The design makes innovative use of existing flash bulb circuitry found in disposable cameras as the power source for the devices. The design is exceptionally small and compact. There is a plan for initial procurement of rangefinders utilizing this laser which will be announced separately. Other uses of this device include: ophthalmology applications; due to the precision of the beam it may also lend itself to applications in computer chip processing; and applications in surveying instruments. Due to the numerous applications of this technology the NVESD invites companies to consider Cooperative Research and Development Agreements for developing applications of this technology to their product lines. A preliminary design review package and license application for the required patent is available from NVESD. If interested please request information and respond with the required documents within 30 days.

**FOR FURTHER INFORMATION CONTACT:**
Questions or comments concerning the proposed action should be addressed to Mr. David L. Combs, Chief, Environmental Analysis and Compliance Branch, 1645 South 101st East Avenue, Tulsa, Oklahoma 74128–4629, telephone 918–669–7660, e-mail: David L. Combs@usace.army.mil.
