SUPPLEMENTARY INFORMATION:

- I. Background
- II. Current Actions
- III. Request for Comments

I. Background

The Federal Energy Administration Act of 1974 (Pub. L. No. 93-275, 15 U.S.C. 761 *et seq.*) and the Department of Energy Organization Act (Pub. L. No. 95-91, 42 U.S.C. 7101 *et seq.*) require the Energy Information Administration (EIA) to carry out a centralized, comprehensive and unified energy information program. This program collects, evaluates, assembles, analyzes and disseminates information on energy resource reserves, production, demand, technology and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer-term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chapter 35), provides the general public and other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Any comments received help the EIA to prepare data requests that maximize the utility of the information collected and to assess the impact of collection requirements on the public. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) of the collections under Section 3507(h) of the Paperwork Reduction Act of 1995.

Operators of crude oil and natural gas wells are the target respondents of Forms EIA-23 and EIA-23P. The amount of crude oil, associated-dissolved natural gas, non-associated natural gas and lease condensate production and reserves by individual field are requested of large and intermediate size producers on Form EIA-23. A sample of small operators are required to submit less detailed information on a different version of the form and the majority of small operators are not asked to report annually on Form EIA-23. The selected sample of small operators provide production and available reserves information for crude oil, natural gas and lease condensate at a State or geographic sub-division level on the Form EIA-23. Form EIA-23P is a postcard form used to collect information on possible oil and gas well operators that may be included in future EIA-23 surveys. Information obtained
