BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-6586-4]

Agency Information Collection Activities: Proposed Collection; Comment Request; Part 71 Federal Operating Permit Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): Part 71 Federal Operating Permit Rules, EPA ICR Number 1713.04, OMB Control Number 2060-0336, expiration date May 31, 2000. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before June 30, 2000.

ADDRESSES: For a copy of the draft ICR estimates, contact Scott Voorhees at (919) 541-5348 or "voorhees.scott@epa.gov" and refer to EPA ICR Number 1713.04.

FOR FURTHER INFORMATION CONTACT: Scott Voorhees at (919) 541-5348 and e-mail address listed above.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those which

must apply for and obtain a federally issued operating permit under title V of the Clean Air Act (Act). These, in general, include sources which are defined as "major" under any title of the Act.

Title: Part 71 Federal Operating Permit Rules (OMB Control No. 2060-0336; EPA ICR No. 1713.04.) expiring May 31, 2000.

Abstract: The part 71 program is a Federal operating permits program that will be implemented for sources located in Indian Country, Outer Continental Shelf sources, and also in those areas without acceptable part 70 programs. Title V of the Clean Air Act imposes on States the duty to develop, administer and enforce operating permit programs which comply with title V and requires EPA to stand ready to issue Federal operating permits when States fail to perform this duty. Section 502(b) of the Act requires EPA to promulgate regulations setting forth provisions under which States will develop operating permit programs and submit them to EPA for approval. Pursuant to this section, EPA promulgated 40 CFR part 70 on July 21, 1992 (57 FR 32250) which specifies the minimum elements of State operating permit programs.

Pursuant to regulations promulgated by EPA on February 19, 1999 (64 FR 8247) EPA has authority to establish part 71 programs within Indian Country and EPA began administering the program in Indian country on March 22, 1999. Since many Indian tribes lack the resources and capacity to develop operating permit programs, EPA will administer and enforce part 71 programs in the areas that comprise Indian Country in order to protect the air quality of areas under tribal jurisdiction.

The EPA intends to protect tribal air quality through the development of implementation plans, permits programs and other means, including direct assistance to tribes in developing comprehensive and effective air quality management programs. The EPA will consult with tribes to identify their particular needs for air program development assistance and will provide ongoing assistance as necessary.

The EPA will also issue permits to "outer continental shelf" (OCS) sources (sources located in offshore waters of the United States) pursuant to the requirements of section 328(a) of the Act. For sources beyond 25 miles (40 km) of the States' seaward boundaries, EPA is the permitting authority, and the provisions of part 71 will apply to the permitting of those OCS sources. Permits for sources located within 25 miles of a State's seaward boundaries are issued by the Administrator (or a
