**SUPPLEMENTARY INFORMATION:**

*Title:* 30 CFR 250, Subpart K, Production Rates.

*OMB Control Number:* 1010-0041.  
*Abstract:* The Outer Continental Shelf (OCS) Lands Act, 43 U.S.C. 1331 *et seq.*, gives the Secretary of the Interior (Secretary) the responsibility to preserve, protect, and develop oil and gas resources in the OCS, consistent with the need to make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy resource development with protection of the human, marine, and coastal environments; ensure the public a fair and equitable return on the resources of the OCS; and preserve and maintain free enterprise competition. Section 1334(g)(2) states ". . . the lessee shall produce such oil or gas, or both, at rates . . . to assure the maximum rate of production which may be sustained without loss of ultimate recovery of oil or gas, or both, under sound engineering and economic principles, and which is safe for the duration of the activity covered by the approved plan."

Regulations at 30 CFR 250, subpart K, implement these statutory requirements. We use the information collected to determine if produced gas can be economically put to beneficial use, to analyze the risks of transporting the liquid hydrocarbons against the value of the resource, and to account for volumes of flared gas and burned liquid hydrocarbons. The MMS uses the information in its efforts to conserve natural resources, prevent waste, and protect correlative rights including the Government's royalty interest. Specifically, MMS uses the information to review records of burning liquid hydrocarbons and venting and flaring actions to ensure that they are not excessive; to determine maximum production and maximum efficient rates; to compare the volume of hydrogen sulfide (H<sub>2</sub>S) flared and the sulphur dioxide (SO<sub>2</sub>) emitted to the specified amounts in approved contingency plans; to monitor monthly atmospheric emissions of SO<sub>2</sub> for air quality; to review applications for downhole commingling to ensure that action does not result in harm to ultimate recovery or undervalued royalties.

We will protect information from respondents considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR part 2) and under regulations at 30 CFR 250.196. No items of a sensitive nature are collected. Responses are mandatory.

The PRA provides that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
