Creation of New Agency

On December 9, 1999, the President signed the Motor Carrier Safety Improvement Act of 1999 (Public Law 106-159, 113 Stat. 1748). The new statute established the Federal Motor Carrier Safety Administration in the Department of Transportation. On January 4, 2000, the Secretary rescinded the authority previously delegated to the Office of Motor Carrier Safety (OMCS) (65 FR 220). This authority is now delegated to the FMCSA.

The motor carrier functions of the OMCS' Resource Centers and Division (i.e., State) Offices have been transferred to FMCSA Service Centers and FMCSA Division Offices, respectively. Rulemaking, enforcement, and other activities of the Office of Motor Carrier Safety while part of the FHWA, and while operating independently of the FHWA, will be continued by the FMCSA. The redelegation will cause no changes in the motor carrier functions and operations previously handled by the FHWA or the OMCS. For the time being, all phone numbers and addresses are unchanged.

Background

Sixty-three individuals have requested an exemption from the vision requirement in 49 CFR 391.41(b)(10), which applies to drivers of CMVs in interstate commerce. Under 49 U.S.C. 31315 and 31136(e), the FMCSA (and previously the FHWA) may grant an exemption for a renewable 2-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption." Accordingly, the FMCSA has evaluated each of the 63 exemption requests on its merits, as required by 49 U.S.C. 31315 and 31136(e), and preliminarily determined that exempting these 63 applicants from the vision requirement in 49 CFR 391.41(b)(10) is likely to achieve a level of safety equal to, or greater than, the level that would be achieved without the exemption.

Basis for Preliminary Determination To Grant Exemptions

Independent studies support the principle that past driving performance is a reliable indicator of an individual's future safety record. The studies are filed in FHWA Docket No. FHWA-97-2625 and discussed at 63 FR 1524, 1525 (January 9, 1998). We believe we can properly apply the principle to monocular drivers because data from the vision waiver program clearly demonstrate the driving performance of monocular drivers in the program is better than that of all CMV drivers collectively. (See 61 FR 13338, March 26, 1996.) That monocular drivers in the waiver program demonstrated their ability to drive safely supports a conclusion that other monocular drivers, with qualifications similar to those required by the waiver program, can also adapt to their vision deficiency and operate safely.

The 63 applicants have qualifications similar to those possessed by drivers in the waiver program. Their experience and safe driving record operating CMVs demonstrate that they have adapted their driving skills to accommodate their vision deficiency. Since past driving records are reliable precursors of the future, there is no reason to expect these individuals to drive less safely after receiving their exemptions. Indeed, there is every reason to expect at least the same level of safety, if not a greater level, because the applicants can have their exemptions revoked if they compile an unsafe driving record.

For these reasons, the FMCSA believes exempting the individuals from 49 CFR 391.41(b)(10) is likely to achieve a level of safety equal to, or greater than, the level that would be achieved without the exemption as long as vision in their better eye continues to meet the standard specified in 391.41(b)(10). As a condition of the exemption, therefore, the FMCSA proposes to impose requirements on the individuals similar to the grandfathering provisions in 49 CFR 391.64(b) applied to drivers who participated in the agency's former vision waiver program.

These requirements are as follows: (1) That each individual be physically examined every year (a) by an ophthalmologist or optometrist who attests that vision in the better eye meets the standard in 49 CFR 391.41(b)(10), and (b) by a medical examiner who attests the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provide a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to his or her employer for retention in its driver qualification file or keep a copy in his or her driver qualification file if he or she becomes self-employed. The driver must also have a copy of the certification when driving so it may be presented to a duly authorized Federal, State, or local enforcement official.

In accordance with 49 U.S.C. 31315 and 31136(e), the proposed exemption for each person will be valid for 2 years unless revoked earlier by the FMCSA. The exemption will be revoked if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31315 and 31136. If the exemption is effective at the end of the 2-year period, the person may apply to the FMCSA for a renewal under procedures in effect at that time.

Request for Comments

In accordance with 49 U.S.C. 31315 and 31136(e), the FMCSA is requesting public comment from all interested persons on the exemption petitions and the matters discussed in this notice. All comments received before the close of business on the closing date indicated above will be considered and will be available for examination in the docket room at the above address. Comments received after the closing date will be filed in the docket and will be considered to the extent practicable, but the FMCSA may issue exemptions from the vision requirement to the 63 applicants and publish in the **Federal Register** a notice of final determination at any time after the close of the comment period. In addition to late comments, the FMCSA will also continue to file in the docket relevant information which becomes available after the closing date. Interested persons should continue to examine the docket for new material.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with provisions of the Hours of Service Law (108 Stat. 888, Pub. L. 103-272, 49 U.S.C. 21102(b)). The Hours of Service Law currently makes it unlawful for a railroad to require specified employees to remain on duty in excess of 12 hours. However, the Hours of Service Law contains a provision permitting a railroad, which employs not more than 15 employees subject to the statute, to seek an exemption from the 12 hour limitation.

Apalachicola Northern Railroad Company (AN)

(Waiver Petition Docket No. FRA-1999-5184)

The AN seeks an exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The AN requests a one hour extension to the maximum limit of twelve hours total on-duty time for covered service employees. The request is made due to changing operational needs. The AN currently operates on 96 miles of track in the State of Florida.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the

appropriate docket number (e.g., Waiver Petition Docket Number 1999-5184) and must be submitted to the Docket Clerk, DOT Docket Management Facility, Room PL-401 (Plaza Level), 400 7th Street, S.W., Washington, D.C. 20590. Communications received within 30 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9:00 a.m.-5:00 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's web site at <http://dms.dot.gov>.

Issued in Washington, D.C. on May 18, 2000.

L. 103-272, 49 U.S.C. 21102(b)). The Hours of Service Law currently makes it unlawful for a railroad to require specified employees to remain on duty in excess of 12 hours. Carolina Rail Services, Incorporated (CRS)

(Waiver Petition Docket No. FRA-1998-4566)

CRS seeks continuation of a previously issued exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. CRS states that it is not its intention to employ a train crew over 12 hours per day under normal circumstances, but this exemption, if granted, would help its operation if unusual operating conditions are encountered. CRS provides intra-port
