

To apply these rates to an individual site, identify the total direct site-specific costs of that site (including any DOJ costs but excluding any ATSDR costs) and multiply that total by the appropriate region's indirect cost rate. If you have total site costs including indirect costs using the current labor hours-based rates, total direct site-specific costs consists of the total site costs minus the previously-assessed indirect costs. Adding the direct site-specific costs and the indirect costs calculated under the new methodology will result in the full cost of that site.
