The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 2000–NM–107–AD.

Applicability: All Model 737–300, –400, and –500 series airplanes; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent a severe asymmetric thrust condition during flight which could result in loss of control of the airplane, accomplish the following:

Replacement

(a) Within 1 year after the effective date of this AD: Replace the existing autothrottle computer with a new, improved autothrottle computer in accordance with Boeing Alert Service Bulletin 737–22A1130, dated September 24, 1998.

Spares

(b) As of the effective date of this AD, no person shall install on any airplane, an autothrottle computer having part number

10–62017–1, –2, –3, –4, –5, –11, –21, –23, –25, or –27.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Special Flight Permit

(d) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on June 6, 2000.

Donald L. Riggan,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Background

On October 10, 1996, the Dallas/Fort Worth Metroplex Plan (DFW/MP) was implemented. The DFW/MP was a major airspace redesign project which, in part, decommissioned four Very High Frequency Omnidirectional Range/Tactical Air Navigation (VORTAC) and relocated and commissioned four new VORTAC facilities. The four new navigational VORTAC facilities were designed to enhance the management of aircraft operations in the vicinity of DFW. In support of the DFW/MP, the FAA amended twelve VOR Federal airways (61 FR 41736). However, since the implementation of this amended Federal airway structure the FAA has discovered that further amendment of the existing airway structure would improve aircraft movement and thus management of the navigable airspace in the DFW area. Therefore, revisions to the current airway system in the DFW area are necessary.

The Proposal

The FAA is proposing to amend part 71 of Title 14 Code of Federal Regulations to revise fourteen Federal airways in the vicinity of Dallas/Fort Worth, TX. The proposed rule would amend the following Federal airways: V-15, V-16, V-17, V-566 by modifying the route descriptions; V-63, V-69, V-131, V-305, V-507, V-573 by amending the start points; and V-66, V-163, V-358, and V-407 by modifying the end points. The FAA is proposing this action to simplify the airway structure, thereby, enhancing the management of aircraft operations in the area.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally

current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Federal airways are published in paragraph 6010(a) of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Federal airways listed in this document would be published subsequently in the Order.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9G, Airspace Designations and Reporting Points, dated September 1, 1999, and effective September 16, 1999, is amended as follows:
