C. What Information Is EPA Particularly Interested In?

Pursuant to section 3506(c)(2)(a) of the Paperwork Reduction Act (PRA), EPA specifically solicits comments and information to enable it to:

2. Evaluate the accuracy of EPA's estimates of the burdens of the proposed collections of information.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

D. What Should I Consider When I Prepare My Comments for EPA?

EPA invites you to provide your views on the various options EPA proposes, new approaches EPA hasn't considered, the potential impacts of the various options (including possible unintended consequences), and any data or information that you would like EPA to consider during the development of the final action. You may find the following suggestions helpful for preparing your comments:

- Explain your views as clearly as possible.
- Describe any assumptions that you used.
- Provide technical information and/or data to support your views.

- If you estimate potential burden or costs, explain how you arrived at the estimate.
- Provide specific examples to illustrate your concerns.
- Offer alternative ways to improve the rule or collection activity.
- Make sure to submit your comments by the deadline in this notice.
- At the beginning of your comments (e.g., as part of the "Subject" heading), be sure to properly identify the document on which you are commenting. You can do this by providing the docket control number assigned to the notice, along with the name, date, and **Federal Register** citation, or by using the appropriate EPA ICR or the Office of Management and Budget (OMB) control number.

IV. To What Information Collection Activity or ICR Does This Notice Apply?

EPA is seeking comments on the following ICR:

Title: Notification of Episodic Releases of Oil and Hazardous Substances.

ICR numbers: EPA ICR No. 1049.09 OMB No. 2050-0046.

ICR status: This ICR is currently scheduled to expire on June 30, 2000. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's information collections appear on the collection instruments or instructions, in the **Federal Register** notices for related rulemakings and ICR notices, and, if the collection is contained in a regulation, in a table of OMB approval numbers in 40 CFR part 9.

Abstract: Section 103(a) of CERCLA, as amended, requires the person in charge of a facility or vessel to immediately notify the National Response Center (NRC) of a hazardous substance release into the environment if the amount of the release equals or exceeds the substance's reportable quantity (RQ) limit. The RQ of every hazardous substance can be found in Table 302.4 of 40 CFR 302.4.

Section 311 of the CWA, as amended, requires the person in charge of a vessel to immediately notify the NRC of an oil spill into U.S. navigable waters if the spill causes a sheen, violates applicable water quality standards, or causes a sludge or emulsion to be deposited beneath the surface of the water or upon adjoining shorelines.

The reporting of a hazardous substance release that is above the

substance's RQ allows the Federal government to determine whether a Federal response action is required to control or mitigate any potential adverse effects to public health or welfare or the environment. Likewise, the reporting of oil spills allows the Federal government to determine whether cleaning up the oil spill is necessary to mitigate or prevent damage to public health or welfare or the environment.

The hazardous substance and oil release information collected under CERCLA section 103(a) and CWA section 311 also is available to EPA program offices and other Federal agencies who use the information to evaluate the potential need for additional regulations, new permitting requirements for specific substances or sources, or improved emergency response planning. Release notification information, which is stored in the national Emergency Response Notification System (ERNS) data base, is available to State and local government authorities as well as the general public. State and local government authorities and the regulated community use release information for purposes of local emergency response planning. Members of the general public, who have access to release information through the Freedom of Information Act, may request release information for purposes of maintaining an awareness of what types of releases are occurring in different localities and what actions, if any, are being taken to protect public health and welfare and the environment. ERNS fact sheets, which provide summary and statistical information about hazardous substance and oil release notifications, also are available to the public.

V. What Are EPA's Burden and Cost Estimates for This ICR?

Under the PRA, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. For this collection, it includes the time needed to review instructions; develop, acquire, install, and use technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The annual public burden for this collection of information is estimated to average 4.1 hours per reportable hazardous substance release or oil spill. The following is a summary of the estimates taken from the ICR:

Respondents/affected entities: Entities potentially affected by this action are facilities or vessels that manufacture, process, transport, or otherwise use certain specified hazardous substances and oil.

Estimated total number of reportable releases of hazardous substances and oil per year: 29,204.

Frequency of response: When a reportable release occurs.

Estimated total annual burden hours: 119,737 hours.

Estimated total annual burden costs: \$3,411,000.

VI. Are There Changes in the Estimates from the Last Approval?

In the renewal ICR, EPA will review the current burden and cost statement and adjust it accordingly. EPA does not expect the burden and cost statement in the renewal ICR to differ significantly from the burden and cost statement in the current ICR.

VII. What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact Lynn Beasley, (703) 603-9086. Facsimile number: (703) 603-9104. Electronic address: beasley.lynn@epa.gov.
