**Established of Class E Airspace; Copperhill, TN**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action establishes Class E airspace at Copperhill TN. A Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP), helicopter point in space approach, has been developed for Copperbasin Medical Center, Copperhill, TN. As a result, controlled airspace extending upward from 700 feet Above Ground

Level (AGL) is needed to accommodate the SIAP.

**SUPPLEMENTARY INFORMATION:**

**History**

On May 5, 2000, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing Class E airspace at Copperhill, TN (65 FR 26160). This action provides adequate Class E airspace for IFR operations at Copperbasin Medical Center. Designations for Class E airspace extending upward from 700 feet or more above the surface are published in FAA Order 7400.9G, dated September 1, 1999 and effective September 16, 1999, which is incorporated by reference in 14 CFR part 71.1. The Class E designation listed in this document will be published subsequently in the Order.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

**The Rule**

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes Class E airspace at Copperhill, TN.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation, as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
