[Docket No. FR-4564-N-05]

Notice of Proposed Information Collection: National Survey of Lead Hazards in Child Care Facilities

AGENCY: Office of Lead Hazard Control, HUD.

This Notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the

Title of Proposal: National Survey of Lead Hazards in Child Care Facilities.

OMB Control Number: To be assigned.

Need for the Information and Proposed Use: Lead is a highly toxic heavy metal that adversely affects virtually every organ system in the body. Young children are particularly susceptible to the effects of lead. Lead poisoning remains one of the top childhood environmental health problems today. The most current national survey (1991-1994) shows that nearly 900,000 children are lead poisoned. A large body of evidence shows that the most common source of lead exposure for children today is lead

paint in older housing and the contaminated dust and soil it generates. The Department of Housing and Urban Development (HUD) conducted a National Survey of Lead Hazards in Housing in 1999. This proposed survey on child care facilities is required to supplement the National Survey in residential homes. Young children may spend a significant portion of their time in child care facilities. Although child care facilities have the same painting history as does housing across the Nation, the environmental conditions and exposure characteristics maybe different. There is no systematic national survey previously done for lead hazards in child care facilities, and the extent of lead hazards in child care facilities is unknown. Results from this survey will provide current information needed for regulatory and policy decisions and enables an assessment of progress in making the U.S. housing stock lead-safe.

Agency Form Numbers: None.

Members of Affected Public: Operators of licensed child care facilities.

Total Burden Estimate (first Year):

Task	Number of respondents	×	Frequency of responses	×	Hours per response	=	Burden hours
Respondents	220		1		3		660

Total Estimated Burden Hours: 660.

Status of the Proposed Information Collection: New request.

Authority: The Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: June 20, 2000.

David E. Jacobs,
 Director, Office of Lead Hazard Control.
