Background

The WRAP was created as the successor organization to the Grand Canyon Visibility Transport Commission (GCVTC), which made over 70 recommendations in June 1996 for improving visibility in 16 national parks and wilderness areas on the Colorado Plateau. The Partnership promotes, supports and monitors implementation of those recommendations throughout the West. Under EPA's Regional Haze Rule (64 FR 35713, July 1, 1999), nine of the Western states have the option to comply with the GCVTC's regional

visibility protection program. The program requires the establishment of a regional emission milestone for 2018, in addition to interim milestones. The recommendations and options regarding the market trading program were developed over the last two years by WRAP committees comprising a diverse group of stakeholders including industry, environmental groups and academia.
