The Proposal

The FAA proposes to amend 14 CFR part 71 by revising Class E airspace at Wainwright, AK, due to the revision of several instrument approach procedures to RWY 4 and RWY 22. The intended effect of this proposal is to provide additional controlled airspace for IFR operations at Wainwright, AK.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 in FAA Order 7400.9G, Airspace Designations and Reporting Points, dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

1. The authority citation for 14 CFR part 71 continues to read as follows:

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9G, Airspace Designations and Reporting Points, dated September 1, 1999, and effective September 16, 1999, is to be amended as follows:

(Lat. 70°38′17″N, long. 159°59′41″W.)

That airspace extending upward from 700 feet above the surface within a 8.5 mile radius of the Wainwright Airport; and that airspace extending upward from 1.200 feet above the surface from lat. 70°54′00″ N long. 159°06′00″ W. to lat. 70°36′00″ N long. 161°00′00″ W. to lat. 70°20′00″ N long. 161°00′00″ W. to lat. 70°30′00″ N long. 159°30′00″ W. to lat. 70°40′00″ N long. 159°00′00″ W. to the point of beginning.

Issued in Anchorage, AK, on June 27, 2000.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM’s should call the FAA’s Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 (part 71) to modify Federal Airway V–382 by eliminating the route segment between Bryce Canyon and Grand Junction, CO, VORTAC. Since 1998, V–382 has been unusable between Bryce Canyon, UT, VORTAC and the Grand Junction, CO, VORTAC. This segment of V–382 no longer passes flight inspection and is out of service. The proposed amendment would retain the route segment from Grand Junction, CO, VORTAC to Durango, CO, VORTAC.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT’s Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Domestic VOR Federal Airways are published in paragraph 6010(a) of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Domestic VOR Federal airways listed in this document would be published subsequently in the order.

Approval and Promulgation of Air Quality Implementation Plans; Massachusetts; VOC Regulation for Large Commercial Bakeries

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a State Implementation Plan (SIP) revision submitted by the Commonwealth of Massachusetts. This revision establishes and requires Large Commercial Bakeries to meet VOC Reasonably Available Control Technology (RACT) requirements. In the Final Rules section of this Federal Register, EPA is approving the State’s SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to that direct final rule, no further action is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this proposal. Any parties interested in commenting on this proposal should do so at this time.

DATES: Comments must be received on or before August 4, 2000.
