The EEZ off Texas is normally closed to all trawling each year from 30 minutes after sunset on May 15 to 30 minutes after sunset on July 15. The regulations at 50 CFR 622.34(h) describe the area of the Texas closure and provide for adjustments to the beginning and ending dates by the Regional Administrator, Southeast Region, NMFS, under procedures and restrictions specified in the FMP.

The beginning and ending dates of the Texas closure are based on biological sampling by Texas Parks and Wildlife Department (TPWD). The closure date is established based on projected times that brown shrimp in Texas bays and estuaries will reach a mean size of 90 mm, and begin strong emigrations out of the bays and estuaries during maximum duration ebb tides. The waters off of Texas are re-opened to shrimping based on projections indicating that brown shrimp will reach a mean size of 112 mm, in concurrence with maximum duration ebb tides. Biological data collected by TPDW indicates that the criteria to end the Texas closure will be met on July 5, 2000. Accordingly, the time and date for ending the Texas closure is changed from 30 minutes after sunset on July 15, 2000, to 30 minutes after sunset on July 5, 2000.
