

team behavior during a workshop conducted by qualified researchers. Data generated for the study will be entered into a study database by the research team. Each individual and team will be assigned a participant and team code at the beginning of the effort. This code will be the primary identifier during data entry as well as analysis. Data that personally identify a participant may be stored in the master database for tracking purposes, but will not be reported or released without the specific consent of that individual. Aggregate data and resulting conclusions may be released in the form of summary reports, technical and academic papers, and formal briefings or presentations. The study team also plans to establish a public Internet site, where the IT Team members participating may go to learn about the study results and conclusions.
