

FOR FURTHER INFORMATION CONTACT: Mr. Don Young, Assistant Area Manager, Yuma Area Office, Bureau of Reclamation, 7301 Calle Agua Salida, P.O. Box D, Yuma, Arizona 85366.

SUPPLEMENTARY INFORMATION: On November 17, 1988, Public Law 100-675 authorized the Secretary of the Interior to line the Coachella Canal or to recover seepage from the canal using construction funds from California water agencies entitled to the use of Colorado River water. A DEIS/DEIR was prepared for this project after public scoping meetings were held in 1988, 1989 and 1992 to identify issues, develop alternatives and provide information to the public on the project plan. In addition, Reclamation chaired various interagency work groups to evaluate project effects, develop alternatives and identify mitigation measures. Based upon this public/agency input, four alternatives were developed for this project: (1) Conventional lining, (2) underwater lining, (3) construction of a parallel canal, and (4) the no action alternative. The DEIS/DEIR for the project was completed and circulated to other government agencies, interested parties, and the public for review and comment from January 11 to March 15, 1994. However, following the public involvement process, the DEIS/DEIR was not revised to produce a FEIS/FEIR because funding was not available for the project.

California has now provided appropriated funds to finance the lining of the remaining unlined portions of the Coachella Branch of the All American Canal. The environmental analysis for this project will be updated to evaluate the status of resources since the original DEIS/DEIR was prepared. Since the alternatives have not changed for this project, further scoping is not required. Substantive comments received during the first public review of the document will be evaluated and incorporated into the revised DEIS/DEIR. The revised DEIS/DEIR will be distributed to the public and interested agencies/cooperators for a 60-day review and comment period. A Notice of Availability will be published when the revised DEIS/DEIR is available for public review and comment, and a public hearing has been scheduled.

The Coachella Canal delivers an average of 300,000 acre-feet of Colorado River water each year to the Coachella Valley Water District (CVWD), situated on the north end of the Salton Sea. The canal begins at a turnout on the All American Canal near the international boundary with Mexico and runs through the desert, east of the Salton Sea, before

it enters the irrigated area of the CVWD. The canal was excavated through desert soils in the 1940's and was placed in operation as a partially lined and unlined canal in 1948.

The first 49-mile section of the canal, which runs through the sandy soil of the East Mesa, had especially high leakage; consequently it was lined in 1980 to conserve water pursuant to Title I of the Colorado River Basin Salinity Control Act (Public Law 93-320). The canal was "lined" by constructing a new canal parallel to the existing canal and connecting the new canal to existing concrete structures. The last 37 miles of the canal were lined when the canal was originally constructed.

The intervening section of canal was constructed in a mixture of gravel and clay soils. The rate of seepage from this section was not as high as in the first 49 miles, so lining was deferred. This section contains 33.4 miles of unlined canal (between siphons 7 and 14 and siphons 15 and 32) that are proposed for lining by this project. Between siphons 14 and 15, the canal was lined experimentally in 1991. The length of unlined canal does not include the lengths of the pipe siphons (wash crossings and rail road crossings), which are not proposed for replacement.

Anyone interested in more information concerning the Coachella Canal Lining Project should contact Mr. Young as provided above.

Dated: July 18, 2000.

Regional Director.
