

consistent with Section 6(b)(5) of the Act¹⁶ because it is designed to promote just and equitable principles of trade, facilitate transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and protect investors and the public interest.

The Commission notes that the Gold/Silver Index is currently traded under Phlx Rule 1009A, which requires that no single component security represents more than 25% of the weight of the Index, and the five highest weighted components do not in the aggregate account for more than 50% of the weight of the Index. Based on the Phlx's representations, the Index is one of the Phlx's most actively-traded index options with an average daily trading volume of 1,559 contracts from January to June 2000.¹⁷ The Phlx proposes to change the concentration requirement to make it similar to that of the Exchange's Box Maker Index. Under the Box Maker Index, no single component security may represent more than 35% of the weight of the Index, and the three highest weighted components cannot in the aggregate account for more than 65% of the weight of the index.¹⁸ The Commission finds that changing the Gold/Silver Index to adopt the requirements that no single component security represents more than 35% of the weight of the Index, and that the three highest weighted components do not in the aggregate account for more than 65% of the weight of the index, comports with the standards in the Box Maker Index, which were previously approved by the Commission.¹⁹ Thus, the Commission finds that the proposed amendment to Phlx Rule 1009(a)(6) relating to the Gold/Silver Index is consistent with the Act.

The Commission also finds that by adopting the proposed rule change to provide that no one component shall account for more than 35% of the weight of the Index and the three highest weighted components shall not account for more than 65% of the weight of the Index is an effective way to continue listing the Index, while still protecting against material changes in the composition and design of the Index that might adversely affect the Exchange's obligations to protect investors and to maintain fair and orderly markets in options based on the Index.

The Commission finds that the trading of options on the Index may

facilitate transactions in securities, help remove impediments to a free and open securities markets, and promote the interest of investors by providing investors with a means of hedging exposure to market risks associated with the securities issued by the companies in the Gold/Silver index. The proposed rule change will allow investors uninterrupted use of the Index as an additional trading and hedging mechanism.

The Commission also finds good cause for approving the proposed rule change prior to the 30th day after the date of publication of notice thereof in the **Federal Register**. The Commission finds that in the interest of the public and for the protection of investors the proposed rule change should be given accelerated approval to allow for the uninterrupted trading of the Index and to continue listing additional series in the options following the July expiration.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,²⁰ that the proposed rule change (SR-Phlx-00-69) is hereby approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.²¹

Margaret H. McFarland,
Deputy Secretary.
