[Docket No. RM98–1–000]

Regulations Governing Off-the-Record Communication; Public Notice

July 28, 2000.

This constitutes notice, in accordance with 18 CFR 385.2201(h), of the receipt of exempt and prohibited off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive an exempt or a prohibited off-the-record communication relevant to the merits of a contested on-the-record proceeding, to deliver a copy of the communication, if written, or a summary of the substance of any oral communication, to the Secretary.

Prohibited communications will be included in a public, non-decisional file associated with, but not part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any

responses thereto should become part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such requests only when it determines that fairness so requires.

Exempt off-the-record communications will be included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

SUPPLEMENTARY INFORMATION:

Title: Voluntary Cover Sheet for TSCA Submissions (OMB Control No. 2070–0156; EPA ICR No. 1780.02) expiring 09/30/2000. This is a request for extension of a currently approved collection.

Abstract: The Toxic Substances Control Act (TSCA) requires industry to submit information and studies for existing chemical substances under sections 4, 6, and 8. Under normal reporting conditions, EPA receives approximately 1,700 submissions each year; each submission represents on average three studies. In addition, specific data call-ins can be imposed on industry.

The Agency, in cooperation with industry stakeholders, is pursuing the electronic transfer of TSCA summary data and of full submissions to EPA. The Chemical Manufacturers Association developed a standardized cover sheet for voluntary use by industry to begin familiarizing companies with standard requirements and concepts of electronic transfer. This form was designed for voluntary use as

a cover sheet for submissions of information under TSCA sections 4, 8(d) and 8(e). The cover sheet facilitates submission of information by displaying certain basic data elements, permitting EPA more easily to identify, log, track, distribute, review and index submissions, and to make information publicly available more rapidly and at reduced cost, to the mutual benefit of both the respondents and EPA. The information collection request referenced in this notice applies to the use of this form/cover sheet.

Responses to the collection of information are voluntary. Respondents may claim all or part of a document confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on October 1, 1999 (64 FR 53377). EPA received no comments on this ICR during the comment period.

Burden Statement: The annual public reporting burden for this collection of information is estimated to average 0.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Companies that manufacture, process, use or import chemical substances and that are subject to reporting requirements under TSCA sections 4, 8(d) or 8(e).

Frequency of Collection: On occasion.
Estimated No. of Respondents: 1,830.
Estimated Total Annual Burden on Respondents: 915 hours.

Estimated Total Annual Non-Labor Costs: \$0.

Changes in Burden Estimates: The total burden associated with this ICR has decreased from 1,348 hours in the previous ICR to 915 for this ICR. This decrease in burden represents an adjustment resulting from a net decrease in the number of submissions expected.

According to the procedures prescribed in 5 CFR 1320.12, EPA has submitted this ICR to OMB for review and approval. Any comments related to the renewal of this ICR should be submitted within 30 days of this notice, as described above.

Dated: July 20, 2000.

Director, Collection Strategies Division.

Title: Information Collection Request: The SunWise School Program EPA ICR No. 1904.01. This is a new collection.

Abstract: The goal of the SunWise School Program is to teach children and their care givers how to protect

themselves from overexposure to the sun. The SunWise School Program recognizes the challenge of measuring the progress and evaluating the effectiveness of an environmental and public health education program where the ultimate goal is to reduce risk and improve public health. Therefore, the continual and careful evaluation of program effectiveness through surveying is necessary to monitor progress and refine the program. Surveys to be developed and administered include: (1) Student survey to identify current sun safety knowledge and behaviors among students; (2) Parent survey to compare findings with those of their children as well as to draw comparisons with the benchmarks established in other national surveys; (3) Teacher questionnaire for measuring their receptivity to the educational component of the Program; and (4) School administrator questionnaire to show receptivity to the SunWise School Program and its standards. The data will be analyzed and results will indicate the Program's effect on participants' sun-protection attitudes and behaviors. Responses to the collection of information are voluntary. All responses to the collection of information remain anonymous and confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
