

correspondence, enclose a stamped, self-addressed postcard or envelope. Please submit electronic comments in Microsoft Word, Wordperfect, or ASCII (plain text) format. Avoid using special characters and encryption in your document(s). Please include your name, affiliation, address and phone number. All information provided will become part of the public record. To avoid duplication of documents in the public record, please do not send the same information by paper copy and email.

To assure we have time to review all written information before completing our assessment, please send all written information by August 23, 2000.

*How and where to review written information and comments:* The record for this notice has been established under docket number W-00-17 (Cruise Ships), and includes supporting documentation as well as printed versions of electronic correspondence. The record is available for inspection from 9 a.m. to 4 p.m., Monday through Friday, excluding legal holidays, at the Water Docket, EB 57, USEPA Headquarters, 401 M. St., SW., Washington, DC. For access to docket materials, please call 202-260-3027.

*Background:* On March 17, 2000, EPA received a petition asking that EPA undertake an "assessment of the volumes and characteristics of the spectrum of waste streams from cruise ships, analysis of their potential impact on water quality, the marine environment, and human health." In response to that petition, we are assessing whether discharges from cruise ships currently pose a risk to the environment. EPA is working with the Coast Guard and other Federal agencies on this assessment.

The discharges of particular interest from cruise ships are gray water (wastewater from baths, sinks and galleys), black water (wastewater from toilets), oily bilge water, solid waste (e.g., food waste, paper, cardboard, plastic, wood, metal, glass) and wastes from equipment operations, hotel and restaurant services, photo labs, dry-cleaning, and paints.

Specific information that we are requesting for wastewater, solid waste, and hazardous materials includes:

- (1) Quantities and properties;
- (2) Methods of discharge or disposal;
- (3) Locations of discharge or disposal, such as outside of State waters, 10 miles from port, or in-port waste receptacles;
- (4) Environmental impacts; and
- (5) Existing regulatory or voluntary controls.

As we consider the range of environmental issues concerning these cruise ship discharges, we are also

interested in learning about voluntary environmental management programs and standards used by various cruise ships. We are interested in hearing about new and alternative approaches being proposed or used by the cruise ship industry or by public-private partnerships. These approaches may include: environmental management systems based on ISO 14000 and/or the International Safety Management (ISM) System Code; environmental certification programs developed by Ship Classification Societies; and local or regional Memoranda of Understanding or other agreements between the industry, government, and other stakeholders. We are interested in a comprehensive picture of how various pollution prevention programs are currently being used and how these efforts might be advanced to protect the marine environment. In addition, we are soliciting comments on whether we should consider changes to existing controls or regulations or add new regulations for control of these discharges in order to more adequately protect the environment from the effects of these discharges.

We are not attempting to collect information or comment on air emissions from cruise ships, or on possible impacts of cruise ships other than from their waste management or discharge practices, at these public information hearings.

Dated: August 7, 2000.

### **National and Governmental Advisory Committees to the U.S. Representative to the Commission for Environmental Cooperation**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of meeting.

**SUMMARY:** Pursuant to the Federal Advisory Committee Act (Public Law 92-463), the U.S. Environmental Protection Agency (EPA) gives notice of a meeting of the National Advisory Committee (NAC) and Governmental Advisory Committee (GAC) to the U.S. Representative to the Commission for Environmental Cooperation (CEC).

The National and Governmental Advisory Committees advise the

Administrator of the EPA in the Administrator's capacity as the U.S. Representative to the Council of the North American Commission on Environmental Cooperation. The Committees are authorized under Articles 17 and 18 of the North American Agreement on Environmental Cooperation (NAAEC), North American Free Trade Agreement Implementation Act, Public Law 103-182 and as directed by Executive Order 12915, entitled "Federal Implementation of the North American Agreement on Environmental Cooperation." The Committees are responsible for providing advice to the United States Representative on a wide range of strategic, scientific, technological, regulatory and economic issues related to implementation and further elaboration of the NAAEC. The National Advisory Committee consists of 12 representatives of environmental groups and non-profit entities, business and industry, and educational institutions. The Governmental Advisory Committee consists of 12 representatives from state, local and tribal governments.

**DATES:** The Committees will meet on Thursday, September 7, 2000 from 9:00 a.m. until 5:30 p.m., and on Friday, September 8, 2000 from 8:30 a.m. to 3:00 p.m.

**ADDRESSES:** The Embassy Suites Hotel at San Diego Bay, 601 Pacific Highway, San Diego, California. The meeting is open to the public, with limited seating on a first-come, first-served basis.

**FOR FURTHER INFORMATION CONTACT:** Mr. Mark Joyce, Designated Federal Officer, U.S. EPA, Office of Cooperative Environmental Management, at (202) 564-9802.

Dated: July 20, 2000.
