SUPPLEMENTARY INFORMATION: On March 23, 1995, EPA published the Final Water Quality Guidance for the Great Lakes System (Guidance) pursuant to section 118(c)(2) of the Clean Water Act, 33 U.S.C. 1268(c)(2). (March 23, 1995, 60 FR 15366). The Guidance, which was codified at 40 CFR part 132, requires the Great Lakes States to adopt and submit to EPA for approval water quality criteria, methodologies, policies and procedures that are consistent with the Guidance. 40 CFR part 132.4 & 132.5. EPA is required to approve of the State's submission within 90 days or notify the State that EPA has determined that all or part of the submission is inconsistent with the Clean Water Act or the Guidance and identify any necessary changes to obtain EPA approval. If the State fails to make the necessarychanges within 90 days, EPA must publish a notice in the **Federal Register** identifying the approved and disapproved elements of the submission and a final rule identifying the provisions of part 132 that shall apply for discharges within the State.EPA received the submission from Pennsylvania and reviewed it for consistency with the Guidance in accordance with 40 CFR part 131 and 132.5. On April 14, 1998, EPA published in the **Federal Register** a notice pursuant to 40 CFR 132.5(e) which solicited comment on the substantial National Pollutant Discharge Elimination System (NPDES) program modification component of Pennsylvania's submission. (63 FR 18195). On December 18, 1998, in a letter from EPA Region 3 to the Pennsylvania Department of Environmental Protection, EPA described in detail those provisions in Pennsylvania's submission determined to be inconsistent with the Guidance and subject to disapproval if not remedied by the Commonwealth. On January 14, 1999, EPA published in the **Federal Register** a Notice of Availability of the letter, and invited public comment on the findings in the letter. (64 FR 2490). In a letter dated March 17, 1999, and in subsequent submittals, Pennsylvania addressed all the inconsistencies identified in EPA's December 18, 1998 letter and EPA has determined that the entirety of the Commonwealth's submission is consistent with 40 CFR part 132. Pennsylvania's submission consists of standards, methodologies, policies and procedures adopted in accordance with the following provisions of the Guidance: the definitions in 40 CFR 132.2; the water quality criteria for the protection of aquatic life, human health and wildlife in tables 1-4 of part 132; the methodologies for development of aquatic life criteria and values, bioaccumulation factors, human health criteria and values and wildlife criteria in Appendices B-D of part 132; the antidegradation policy in Appendix E of part 132; and the implementation procedures in Appendix F of part 132. EPA approves these elements pursuant to 40 CFR 132.5.

Today's final action only addresses the provisions adopted by Pennsylvania to comply with section 118(c)(2) of the Clean Water Act and 40 CFR part 132. EPA is taking no action at this time with respect to other revisions Pennsylvania may have made to its NPDES program or water quality standards in areas not

addressed by the Guidance or applicable outside of the Great Lakes System.

The purpose of the program is to gain an increased understanding of the ecology of Lyme disease in the United States that will lead directly to the design of new prevention strategies to limit the transmission of the etiologic agent of Lyme disease, *Borrelia*

burgdorferi, and closely related *Borrelia* organisms.

a. Define studies to address the following ecological issues:

(1) Tick population densities. Determine the biotic and abiotic factors that potentially regulate population densities of questing nymphal populations of *Ixodes scapularis* and *Ixodes pacificus* vector ticks. The influence of temperature, humidity, soil type, vegetation, and leaf litter on the density of questing nymphal ticks are examples of abiotic factors. The availability of hosts is a biotic factor.

(2) Prevalence of infection. Determine the biotic and abiotic factors that potentially regulate the prevalence of infection with *Borrelia burgdorferi*
