SUPPLEMENTARY INFORMATION: On May 25, 2000 (65 FR 34002), FTA published an NPRM proposing the establishment of regulations to implement a portion of Section 5206(e) of the TEA-21 which requires ITS projects funded from the highway trust fund to conform to the National ITS Architecture, applicable or provisional standards, and protocols.

Since that date, FTA has received requests from the American Association of State Highway and Transportation Officials, the American Public Transportation Association, the Association of Metropolitan Planning Organizations, and several State Departments of Transportation to extend the comment period. These groups voiced concerns that the proposed rule was extremely complex and that 90 days was insufficient time to assess the impact of the proposed rules and provide meaningful comments. We agree that more time for an in-depth analysis of the NPRM would be beneficial to FTA in this rulemaking. For these reasons, FTA is extending the comment period by 30 days, until September 23, 2000.

SUPPLEMENTARY INFORMATION:**Background**

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable Federal motor vehicle safety standards.

At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation.
