[30DAY-58-00]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-7090. Send written comments to CDC, Desk Officer; Human Resources and Housing Branch, New Executive Office Building, Room 10235;

Washington, DC 20503. Written comments should be received within 30 days of this notice.

Proposed Projects

National Surveillance for Hospital Health Care Workers (NaSH)—Reinstatement—National Center for Infectious Diseases (NCID)—has developed a surveillance system called the National Surveillance System for Health Care Workers (NaSH) that focuses on surveillance of exposures and infections among hospital-based health care workers (HCWs). NaSH (OMB 0920-0417) includes standardized methodology for various occupational health issues. It is a collaborative effort of the Hospital Infections Program, National Center for Infectious Diseases (NCID); the Hepatitis Branch, Division of Viral and Rickettsial Diseases, NCID; the Division of Tuberculosis (TB) Elimination, National Center for HIV, STD, and TB Prevention (NCHSTP); the National Immunization Program (NIP), and the National Institute for Occupational Safety and Health (NIOSH).

NaSH consists of modules for collection of data about various occupational issues. Baseline information about each HCW such as demographics, immune-status for vaccine-preventable diseases, and TB status is collected when the HCW is enrolled in the system. Results of routine tuberculin skin test (TST) are collected and entered in the system every time a TST is placed and read; follow-up information is collected for HCWs with a positive TST. When an HCW is exposed to blood/bloodborne pathogen, to a vaccine-preventable disease (VPD), or to an infectious TB patient/HCW, epidemiologic data are collected about the exposure. For HCWs exposed to a bloodborne pathogen (i.e., HIV, HCV, or HBC) and for susceptible HCWs exposed to VPDs, additional data are collected during follow-up visits. Once a year, hospitals complete a survey to provide denominator data and every 2-5 years, the hospitals perform a survey to assess the level of underreporting of needlesticks (HCW Survey). Optionally, hospitals may collect information about HCW noninfectious occupational injuries such as acute musculoskeletal injuries.

Data are entered into the software and transmitted on diskette to CDC. No HCW identifiers are sent to CDC. This system is protected by the Assurance of Confidentiality (308d).

Data collected in NaSH will assist hospitals, HCWs, health care organizations, and public health agencies. This system will allow CDC to
