Invitation of the Public To Review and Comment on Recommended Recreation Guidelines To Meet Land Health Standards

AGENCY: Bureau of Land Management (BLM), Department of the Interior.

ACTION: Notice.

SUMMARY: The BLM has recommended recreation guidelines to meet land health standards for lands administered by BLM in Colorado. This notice serves to announce that the recommended recreation guidelines are available for review and comment by the public.

DATES: The deadline for comment on the recommended recreation guidelines is September 22, 2000.

SUPPLEMENTAL INFORMATION: In February 1997, Standards for Public Land Health in Colorado (Standards) were approved by the Secretary of Interior and adopted as decisions in all of BLM's land use plans, commonly referred to as Resource Management Plans (RMP). The Standards describe natural resource conditions that are needed to sustain public land health. The Standards encompass upland soils; riparian systems; plant and animal communities; special, threatened, and endangered species; and water quality. The Standards relate to *all* uses of the public lands, including recreational use.

Guidelines are tools, methods, and techniques that can be used by managers to maintain or meet the standards as they implement various programs on the public lands. Previously, livestock grazing guidelines were developed concurrent with the Standards. Colorado BLM now has recreation guidelines designed to meet public land health standards.

In 1999, all three of Colorado's BLM Resource Advisory Councils (RACs) hosted a series of open houses throughout the state to solicit public comment on draft recreation guidelines. The draft guidelines, developed in consultation with the RACs, addressed problems and issues caused by all recreational activities. A major concern that surfaced during the development of the guidelines was that of the adverse

impacts from improperly managed off-highway vehicle (OHV) travel. The RACs sent a clear message to BLM in the draft guidelines that addressing OHV issues needs to be a high priority.

In January 2000, BLM formed an implementation team to analyze public input and RAC recommendations for adopting recreation guidelines and addressing OHV use on public lands. The team used the recommendations from the RACs as the framework for preparing the BLM-recommended version of the guidelines. The team is also developing a strategy, to be announced later, that will address issues related to OHVs.

With an awareness and understanding of the social and environmental impacts of outdoor recreation, the recreation guidelines were developed to help achieve and maintain healthy public lands as defined by the Standards. The guidelines are tools, methods, and techniques that can be used by managers to meet the Standards as they implement recreation action and decisions on the ground.

The intent of the recreation guidelines is to encourage and permit a variety of recreational opportunities and enjoyable experiences that are managed to avoid conflicts and serve diverse recreational interests, while at the same time minimizing and preventing adverse impacts to land health, ecosystems, and cultural or natural resources, including historic and archaeological sites, soils, water, air, vegetation, scenery, wildlife habitats, riparian areas, endangered or threatened species, and wilderness areas.

FOR FURTHER INFORMATION CONTACT:

Dennis Zachman, Project Management Specialist, Colorado State Office, 2850 Youngfield, Lakewood, Colorado 80215 (303) 239–3883.

A summary of the recommended recreation guidelines is available upon request. Persons can also access this information on the Colorado BLM internet website (www.co.blm.gov).

Dated: August 4, 2000.

Ann J. Morgan,

State Director.

Utah Resource Advisory Council Meeting

SUMMARY: The Bureau of Land Management's Utah Statewide Resource Advisory Council (RAC) will be meeting on August 30, in Provo, Utah.

The purpose of this meeting is to finalize the guidelines for recreation management on BLM lands in Utah.

The meeting will be held at the Provo Marriott Hotel, Maple Room (Mezzanine Level), 101 West 100 North, Provo, Utah. It is scheduled to begin at 8 a.m. and conclude at 4 p.m. A public comment period, where members of the public may address the Council, is scheduled from 1 p.m. to 1:30 p.m. on August 30. All meetings of the BLM's Resource Advisory Council are open to the public.

FOR FURTHER INFORMATION CONTACT:

Sherry Foot, Special Programs Coordinator, Utah State Office, Bureau of Land Management, 324 South State Street, Salt Lake City, UT 84111; phone (801) 539–4195.

Dated: August 9, 2000.

Sally Wisely,

Utah BLM State Director.

Notice of Proposed Withdrawal; Arizona

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Secretary of the Interior proposes to withdraw approximately 299,952.41 acres of Federal lands and minerals to protect the native biodiversity and the ecological richness of the Paria Plateau area in northwestern Arizona. This notice segregates the lands described below for up to 2 years from location and entry under the general land laws, including the mining laws. The lands will remain open to mineral leasing.

FOR FURTHER INFORMATION CONTACT:

Becky Hammond, Bureau of Land Management, Arizona Strip Field Office, 345 E. Riverside Drive, St. George, Utah 84790, 435–688–3200.

SUPPLEMENTARY INFORMATION: The purpose of the proposed withdrawal is to temporarily protect the native biodiversity and the ecological richness of the Paria Plateau area while the lands

are under study for a possible national monument designation. The proposal, if finalized, would withdraw the following described Federal lands and minerals from location and entry under the

general land laws, including the mining laws, but not the mineral leasing laws, subject to valid existing rights.

The areas described aggregate 299,952.41 acres in Coconino County. All lands are Federally owned surface and subsurface unless otherwise noted.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the lands will be segregated from location and entry under the general lands laws, including the mining laws, but not the mineral leasing laws, subject to valid existing rights, unless the proposal is canceled or unless the withdrawal is finalized prior to the end of the segregation period.

Existing uses of the segregated lands may be continued in accordance with their terms except for the location or relocation of mining claims during the pendency of the 2-year segregative period, including but not limited to livestock grazing, legal ingress and egress to any valid mining claims and patented claims that may exist, rights-of-way, access to non-Federal lands and interests in lands, current recreational

uses, and commercial uses being conducted under special use permits.

Dated: August 3, 2000.

Roger G. Taylor,

Arizona Strip Field Manager.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Minerals Management Service (MMS) Outer Continental Shelf (OCS), Gulf of Mexico (GOM) Region, Proposed Use of Floating Production, Storage and Offloading Systems on the Central and Western GOM OCS

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of availability of the Draft Environmental Impact Statement (EIS) and locations and dates of public hearings for the EIS on the proposed use

of floating production, storage and offloading (FPSO) systems in the central and western GOM OCS.

The MMS prepared a draft EIS on ship-shaped FPSO systems which will be used mostly in deepwater areas of the OCS in the Central and Western GOM. The MMS based the EIS analyses on estimates of the kinds and amounts of activity onshore and offshore that could result from the deployment and use of FPSO systems to produce oil and gas in areas of the Central and Western GOM where the present day oil pipeline system does not yet extend. The FPSO systems will produce the oil in the conventional fashion, but will store it on board rather than direct it into pipelines. The FPSO systems will be unloaded regularly by tankers which will transport the oil to Gulf Coast seaports. You may obtain single copies of the draft EIS from the MMS, Gulf of Mexico OCS Region, Attention: Public Information Office (MS-5034), 1201
