

preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For propellers that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent propeller blade cracks and propagation, which could result in propeller blade separation and possible aircraft loss of control, accomplish the following:

Visual Inspections

(a) Perform initial and repetitive visual inspections of propeller blades for cracks across the camber face in accordance with the Accomplishment Instructions of Dowty Aerospace Propellers Service Bulletin (SB) No. S2000-61-75, Revision 3, dated September 30, 1999, as follows:

(1) Initially, conduct a visual inspection within 50 hours time-in-service (TIS) after the effective date of the original AD.

(2) Thereafter, inspect at intervals not to exceed 300 hours TIS since last inspection.

(3) Replace cracked propeller blades prior to further flight with serviceable blades.

Ultrasonic Inspections

(b) Perform initial and repetitive ultrasonic inspections of propeller blades for cracks across the camber face in accordance with the Accomplishment Instructions of Dowty Aerospace Propellers SB No. S2000-61-75, Revision 3, dated September 30, 1999, as follows:

(1) Initially inspect within 200 hours TIS after the effective date of the original AD.

(2) Thereafter, inspect at intervals not to exceed 600 hours TIS since last inspection.

(3) Replace cracked propeller blades prior to further flight with serviceable blades.

Alternative Method of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Boston Aircraft Certification Office (ACO). Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Boston ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Boston ACO.

Special Flight Permits

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the aircraft to a location where the inspection requirements of this AD can be accomplished.

Issued in Burlington, Massachusetts, on August 14, 2000.

David A. Downey,

Assistant Manager, Engine and Propeller Directorate, Aircraft Certification Service.

RIN 2120-AG96

Certification of Airports; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Proposed rule; correction.

SUMMARY: This document makes corrections to the proposed rule published in the **Federal Register** on June 21, 2000 (65 FR 38639), which proposes to revise the current airport certification regulation and to establish certification requirements for airports serving scheduled air carrier operations in aircraft with 10-30 seats.

FOR FURTHER INFORMATION CONTACT: Linda Bruce, 202-267-8553, or E-mail: linda.bruce@faa.gov.

SUPPLEMENTARY INFORMATION:

Correction

In proposed rule FR Doc. 00-14524, published on June 21, 2000 (65 FR 38636), make the following corrections:

1. On page 38654, in the second column, fifth full paragraph, line one, correct "Similar to proposed § 139.317(1)" to read "Similar to proposed § 139.317(k)."

2. On page 38673, in the second column, correct § 139.111 by revising paragraphs (s),(b), and (c) to read as follows:

§ 139.111 Exemptions.

(a) An applicant or a certificate holder may petition the Administrator under 14 CFR 11, General Rulemaking Procedures, of this chapter for an exemption from any requirement of this part.

(b) Under 49 U.S.C. 44706(c), the Administrator may exempt an applicant or a certificate holder that enplanes annually less than one-quarter of 1 percent of the total number of passengers enplaned at all air carrier airports from all, or part, of the aircraft rescue and firefighting equipment requirements of this part, on the grounds that compliance with those requirements is, or would be,

unreasonably costly, burdensome, or impractical. An applicant for, or holder of, an airport operating certificate filing for such an exemption shall use the format prescribed under § 139.321.

(c) Each petition filed under section must be submitted in duplicate to the—

(1) Regional Airports Division Manager; and

(2) U.S. Department of Transportation's Docket Management System, per 14 CFR 11.

3. On page 38677, in the first and second columns correct § 139.137 by removing paragraph (f); and by redesignating paragraphs (g) through (1) as (f) through (k); and by revising newly designated paragraph (f)(3) to read as follows:

§ 139.317 Aircraft rescue and firefighting: Equipment and agents.

* * * * *

(f) * * *

(3) Notwithstanding the requirements of paragraph (f) of this section, any certificate holder whose aircraft rescue and firefighting vehicles are not equipped with turrets or do not have the discharge capacity required in this section, but otherwise met the requirements of this part on December 31, 1987, need not comply with paragraph (f) of this section for a particular vehicle until that vehicle is replaced or rehabilitated.
