#### SUPPLEMENTARY INFORMATION:

##### Background

On April 26, 2000, we published in the **Federal Register** (65 FR 24423-24429, Docket No. 97-065-1) a proposal to amend the regulations governing the importation of fruits and vegetables, contained in 7 CFR part 319. We proposed to allow Fuji variety apples grown in certified orchards within approved production areas in the Republic of Korea to be imported into the United States, without treatment, under conditions designed to prevent the introduction into the United States of the peach fruit moths (*Carposina sasakii* and *C. niponensis*), the yellow peach moth (*Conogethes punctiferalis*), the fruit tree spider mite (*Tetranychus viennensis*), and the kanzawa mite (*T. kanzawai*). The conditions to which the proposed importation of Fuji variety apples would be subject, including pest risk-reducing cultural practices, packinghouse procedures, and inspection and shipping procedures, would reduce the risk of pest introduction to an insignificant level.

Comments on the proposed rule were required to be received on or before June 26, 2000. Several commenters have requested that we extend the comment period on Docket No. 97-065-1 to allow additional time for members of the public to review the proposed rule and to submit comments. In response to these requests, we are reopening and extending the comment period on Docket No. 97-065-1 until October 23, 2000. This action will allow interested persons additional time to prepare and submit comments. Comments already received concerning the proposed importation of Fuji variety apples from the Republic of Korea will remain under consideration and need not be resubmitted.

**SUMMARY:** The Nuclear Regulatory Commission (NRC) is proposing to amend its Rules of Practice applicable to the use of the Licensing Support Network (LSN) for the licensing proceeding on the disposal of high-level waste (HLW) at a geologic repository.
