This set of BMPs has been used in many successful remining projects in Pennsylvania to prevent acid mine drainage and reclaim lands that have been harmed by past mining practices. The proposed XL project would provide for a test of this approach in up to eight watersheds with significant AMD pollution.

**II. What Action is the Agency Taking?**

The Agency is making available a document entitled "Discussion Paper: Harmonization of Imported Treated Seed in Canada and the United States" prepared jointly by the Agency and Health Canada's Pest Management Regulatory Agency (PMRA). The purpose of this document is to provide information on how seed treatment products are currently regulated in both Canada and the United States and to review the degree of regulatory harmonization of seed treatment pesticides in the two countries. This discussion regarding treated seed should also contribute toward the realization of the initiatives of the NAFTA TWG on Pesticides aimed at harmonizing pesticide registration requirements in Canada, the United States, and Mexico.

For the purposes of this document, seed treatments include products which are primarily intended to provide protection against soil fungi and insect damage. Seeds for propagation may be treated domestically or imported as treated seed, may be treated domestically for subsequent export, or

may be planted to produce crop that is to be exported.

Both Canada and the United States require registration of seed treatment products used for domestic seed treatment. Both countries allow exemptions for imported pesticide-treated seeds providing the seed is treated with a pesticide registered in the host country for that specific purpose and where certain other conditions are met (e.g., compliance with coloration and labeling requirements). This discussion paper contains two Appendices. Appendix I compares the legal frameworks in the United States and Canada. Appendix II is a comparison of the general data requirements for a new seed treatment product in the United States and Canada.

The Canadian Pest Management Regulatory Agency has issued this document as a Regulatory Proposal with a 45-day comment period.
