

used to insure that the landfill cover is still intact and the remedy is protective of human health and the environment. EPA issued a five-year review report in 1999 which was an evaluation of the results of the maintenance and monitoring activities at the Site. This report concluded that the Wheeling Disposal Service Company, Incorporated, Landfill site is protective of human health and the environment. The five-year review recommended continuing the O&M activities, including maintenance of the landfill cap and groundwater and surface water sampling.

V. Action

The remedy selected for this Site has been implemented in accordance with the Record of Decision. Therefore, no further response action is necessary. The remedy has resulted in the significant reduction of the long-term potential for release of contaminants, therefore, human health and potential environmental impacts have been minimized. EPA and the MDNR find that the remedy implemented continues to provide adequate protection of human health and the environment.

The EPA, with concurrence of the State of Missouri, has determined that the criteria for deletion of the release have been met. Therefore, EPA is deleting the site from the NPL.

This action will be effective October 30, 2000. However, if EPA receives dissenting comments by October 2, 2000, EPA will publish a document that withdraws this action.
