

**SUPPLEMENTARY INFORMATION:** The project will be approximately 115 miles in length and extend from Tri-State's existing Walsenburg Substation located at Walsenburg, Colorado, and interconnect to a proposed substation site near Gladstone, New Mexico. Facilities will be located in Huerfano and Las Animas Counties, Colorado, and Colfax County, New Mexico.

Alternative Corridor 2 was identified in the Environmental Assessment as the preferred corridor. The northern section of the preferred corridor was subsequently modified based on additional public input as a result of the local permitting process in Las Animas County, Colorado. Based on its environmental assessment of the proposed project, RUS has concluded that the construction, operation and maintenance of the project will not have a significant impact on the quality of the human environment. Therefore, RUS will not prepare an environmental impact statement for this project.

Copies of the FONSI have been sent to Federal, State, and local agencies and the public who have previously requested a copy. The FONSI can also be reviewed at libraries located in communities within the project area and at offices of San Isabel Electric Association in Pueblo, Walsenburg, and Trinidad, Colorado; Springer Electric Cooperative, Inc., in Springer, New Mexico; and Southwestern Electric Cooperative, Inc., in Clayton, New Mexico.

#### DEPARTMENT OF COMMERCE

##### Submission for OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

*Agency:* U.S. Census Bureau.

*Title:* Census 2000 Evaluation Followup Interview.

*Form Number(s):* D-1301 (EFU), D-1301 (EFU) S, D-1379.

*Agency Approval Number:* None.

*Type of Request:* New collection.

*Burden:* 8,000 hours.

*Number of Respondents:* 40,000.

*Avg Hours Per Response:* 12 minutes.

*Needs and Uses:* The Census Bureau requests approval from the Office of Management and Budget (OMB) for clearance of the Evaluation Followup Interview (EFU). This instrument will be used to assist in the evaluation of Census 2000 and the Accuracy and Coverage Evaluation (A.C.E.) processes.

The Census Bureau developed the A.C.E. approach for measuring coverage of the population in the decennial census. In the A.C.E., the Census Bureau independently counts a sample of housing units and the people living in those units, then compares those results to the census. The Census Bureau then uses this comparative information to produce final estimates of the coverage for Census 2000.

The objective of the EFU is to measure and evaluate data collection and measurement error associated with the A.C.E. process. Data collection error can be caused by enumerators, respondents, or the questionnaire design. An example of error caused by a respondent is misunderstanding of the residence rules. Errors caused by an enumerator include falsifying part of a roster or reading a question incorrectly in a way that changes the meaning for the respondent. If the questionnaire does not make it clear who should be counted at a residence, error can occur, too.

The EFU is designed to collect information to evaluate the scope of data collection error. The EFU is a reinterview of some of the households in a subsample of A.C.E. clusters. It is similar to the A.C.E. Person Followup Interview (PFU), but with more questions on specific types of group quarters, other residences and move in and move out dates to help get the "best" residency status and person match code classifications for all sample persons. The EFU will ask about
