### 47 CFR Part 79

[MM Docket No. 99-339; FCC 00-258]

#### Implementation of Video Description of Video Programming

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This document adopt rules to require larger broadcast stations and multichannel programming distributors (MVPDs) to provide programming with video description. This document also adopts rules to require all broadcast stations and MVPDs to pass through any video description they receive from their programming suppliers if they have the technical capability necessary to do so. This document also adopts rules to enhance the accessibility of emergency information. The purpose of these actions is to enhance the accessibility of video programming to persons with visual disabilities.

**DATES:** Section 79.3 is effective April 1, 2002. Section 79.2 contains information collection requirements which have not been approved by the Office Of Management Budget ("OMB"). The Commission will publish a document in the **Federal Register** announcing the effective date of this section.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Report and Order ("R&O"), FCC 00-258, adopted July 21, 2000; released August 7, 2000. The full text of the Commission's R&O is available for

inspection and copying during normal business hours in the FCC Dockets Branch (Room TW-A306), 445 12 St. S.W., Washington, D.C. #### Synopsis of Report and Order

##### I. Introduction

1. In this R&O, we adopt rules designed to bring the benefits of video description to the commercial video marketplace but not impose an undue burden on the video programming production and distribution industries. Video description is the description of key visual elements in programming, inserted into natural pauses in the audio of the programming. It is designed to make television programming more accessible to the many Americans who have visual disabilities.

2. As explained further, we conclude that we have the authority to adopt video description rules, and require the top broadcast stations and multichannel video programming distributors (MVPDs) to provide programming with video description on the top programming networks. This will ensure that the broadcast stations and MVPDs that reach the most people will provide video description for the most watched programming. We also adopt rules to enhance the accessibility of emergency information for people with visual disabilities. Specifically, we adopt rules as follows:

- We require affiliates of the top four commercial broadcast TV networks in the top 25 TV markets to provide 50 hours per calendar quarter of prime time and/or children's programming with video description.

- We also require MVPDs with 50,000 or more subscribers to provide 50 hours per calendar quarter of prime time and/or children's programming with video description on each of the top five national nonbroadcast networks they carry.

- In addition, we require any broadcast station, regardless of its market size, to "pass through" any video description it receives from a programming provider, if the broadcast station has the technical capability necessary to do so, and we require any MVPD, regardless of its number of subscribers, to "pass through" any video description it receives from a programming provider, if the MVPD has the technical capability necessary to do so on the channel on which it
