SUPPLEMENTARY INFORMATION:

I. Abstract

The Bureau of Economic Analysis is responsible for the computation and publication of the U.S. balance of payments accounts. The information collected in this survey is an integral part of the "transportation" portion of the U.S. balance of payments accounts. The balance of payments accounts, which are published quarterly in the Bureau's monthly publication, the *Survey of Current Business*, are one of the major statistical products of BEA. The accounts provide a statistical summary of U.S. international transactions. They are used by government and private organizations for national and international policy formulation, and analytical studies. Without the information collected in this survey, an integral component of the transportation account would be omitted. No other Government agency collects comprehensive annual data on foreign airline operators' revenues and expenses in the United States.

The survey requests information from foreign air carriers operating in the United States. Information is collected on an annual basis from foreign air carriers with total annual covered revenues and total annual covered expenses incurred in the U.S., each over \$500,000. Foreign air carriers with total

annual covered revenues and expenses below \$500,000 are exempt from reporting.

II. Method of Collection

Mandatory reports are received from foreign air carriers who provide data regarding their revenues and expenses in the United States. Submission of the completed report form, or computer printouts in the format of the report form, are the most expedient and economical methods of reporting the information.

Comments are invited on: (a) Whether the continued collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.
