SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau conducts the Construction Project Reporting Surveys (CPRS) to collect information on the dollar value of construction put in place by private companies, individuals, private multifamily residential buildings, and state and local governments. The three CPRS forms are: Form C-700, Private Construction Projects; Form C-700(R), Multifamily Residential Projects; and Form C-700(SL), State and Local Government Projects. These three forms are currently cleared separately. With this revision, we plan to combine these three forms under one clearance. No other substantive changes to the forms are planned.

The Census Bureau is the preeminent collector and provider of timely, relevant and quality data about the people and economy of the United States. Economic data are the Census Bureau's primary program commitment during nondecennial census years. The Form C-700, Private Construction Projects collects construction put in place data for nonresidential projects owned by private companies or individuals. The Form C-700(R), Multifamily Residential Projects collects construction put in place data for private multifamily residential buildings. Form C-700(SL), State and Local Government Projects collects construction put in place data for state and local government projects.

The Census Bureau uses the information from these surveys to

publish the value of construction put in place series. Published estimates are used by a variety of private business and trade associations to estimate the demand for building materials and to schedule production, distribution, and sales efforts. They also provide various governmental agencies with a tool to evaluate economic policy and to measure progress towards established goals. For example, Bureau of Economic Analysis staff use data to develop the construction components of gross private domestic investment in the gross domestic product. The Federal Reserve Board and the Department of Treasury use the value in place data to predict the gross domestic product, which is presented to the Board of Governors and has an impact on monetary policy.

II. Method of Collection

An independent systematic sample of projects is selected each month according to predetermined sampling rates. Once a project is selected it remains in the sample until completion of the project. Preprinted forms are mailed monthly to respondents to fill in current month data and any revisions to previous months. Some respondents are later called by a Census interviewer and report the data over the phone. Having the information available from a database at the time of the interview greatly helps reduce the time respondents spend on the phone. Interviews are scheduled at the convenience of the respondent, further reducing their burden.

III. Data

Estimated Total Annual Burden Hours: C-700 = 18,000; C-700(R) = 4,320; C-700(SL) = 18,000; TOTAL = 40,320.

Estimated Total Annual Cost: 2.7 million.
