Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-7090. Send written comments to CDC, Desk Officer; Human Resources and Housing Branch, New Executive Office Building, Room 10235; Washington, DC 20503. Written

comments should be received within 30 days of this notice.

Proposed Project

Exposure to Aerosolized Brevetoxins During Red Tide Events—New—National Center for Environmental Health (NCEH). *Gymnodinium breve* is the marine dinoflagellate responsible for extensive blooms (called red tides) that form in the Gulf of Mexico. *G. breve* produces potent toxins, called brevetoxins, that have been responsible for killing millions of fish and other marine organisms. The biochemical activity of brevetoxins is not completely understood and there is very little information regarding human health effects from environmental exposures, such as inhaling brevetoxin that has been aerosolized and swept onto the coast by offshore winds. The National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC) is planning to recruit 100 people who work along the coast of Florida and who potentially will be occupationally exposed to aerosolized red tide toxins some time during the year following recruitment.

NCEH plans on administering a base line respiratory health questionnaire

and conducting pre- and post-shift pulmonary function tests during a time when there is no red tide reported near the area. When a red tide develops, we plan to administer a symptom survey and conduct pulmonary function testing (PFT) on a group of study participants who are working in the area where the red tide is near shore, and on a control group of study participants who are not working in an area where the red tide is near shore (*i.e.*, are not exposed to the red tide). We will then compare (1) symptom reports before and during the red tide and (2) the changes in baseline PFT values during the work shift (differences between pre- and post-shift PFT results without exposure to red tide) with the changes in PFT values during the work shift when individuals are exposed to red tide. In addition, we plan to assist in collecting biological specimens (inflammatory cells from nose and throat swabs) to assess whether they can be used to verify exposure and to demonstrate a biological effect (*i.e.*, inflammatory response) from exposure to red tide. There are no costs to respondents. The total burden is estimated to be 201 hours.

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)
Pulmonary History Questionnaire	100	1	20/60
Symptom Questionnaire	100	20	5/60

Dated: September 19, 2000.

Nancy Cheal,

Acting Associate Director for Policy, Planning, and Evaluation, Centers for Disease Control and Prevention (CDC).

Advisory Committee on Immunization Practices: Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the following committee meeting:

Name: Advisory Committee on Immunization Practices (ACIP) Teleconference.

Time and Date: 3:15 p.m.–5 p.m., September 28, 2000.

Place: Teleconference call will originate at the Centers for Disease Control and Prevention in Atlanta, Georgia. Please see “Supplementary Information” for details on accessing the teleconference.

Status: Open to the public, teleconference access limited only by availability of telephone ports.

Purpose: The Committee is charged with advising the Director, CDC, on the appropriate uses of immunizing agents. In addition, under 42 U.S.C. § 1396s, the Committee is mandated to establish and periodically review and, as appropriate, revise the list of vaccines for administration to vaccine-eligible children through the Vaccines for Children (VFC) program, along with schedules regarding the appropriate periodicity, dosage, and contraindications applicable to the vaccines.

Matters to be Discussed: The teleconference agenda will include a discussion of influenza vaccine recommendations for the 2000–2001 influenza season. Discussion will include priority groups for vaccination, implementation measures, and strategies for promoting vaccine delivery later in the influenza season.

Agenda items are subject to change as priorities dictate.

SUPPLEMENTARY INFORMATION: This conference call is scheduled for 3:15 p.m. Eastern Standard Time. To access the teleconference you must dial 1/888/381-5770 and enter conference code 53651. You will then be automatically connected to the call. It is necessary to meet on an expedited basis, to refine vaccine recommendations prior to the influenza season. Therefore, notice is published less than 15 days prior to the teleconference.

CONTACT PERSON FOR MORE INFORMATION: Gloria A. Kovach, Program Analyst, Epidemiology and Surveillance Division, National Immunization Program, CDC, 1600 Clifton Road, NE, m/s E61, Atlanta, Georgia 30333. Telephone 404/639-8096. The Director, Management Analysis and Services office has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both the
