

creating a safety hazard. Safety hazards are created by a narrow road with sharp curves and a surface that is in poor condition. The reported accidents over a period of approximately five years (January 1994 to December 1998) are two to three times higher than typical for this type of road. Solutions are needed to reduce the rate and severity of accidents and to provide for the current and projected traffic demand.

The overall purpose of the project is to cost effectively improve the physical conditions and safety features of Fernan Lake Road, while minimizing adverse impacts to sensitive environmental resources. Project objectives will be based on the needs developed during the scoping process. All improvements must be consistent with the applicable guidelines from the IPNF Forest Plan, Kootenai County plans and ordinances, Idaho state regulations, and federal regulations.

Alternatives under consideration include (1) taking no action; (2) improving the existing road to meet the appropriate Idaho state design criteria; (3) improving the existing road to meet the appropriate American Association of State Highway and Transportation Officials (AASHTO) design criteria; (4) other alternatives that may be developed during the NEPA process.

Notices describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed interest in this proposal. Two public scoping meetings were held during 2000 in Coeur d'Alene, Idaho. Based in part on data collected and comments received, FHWA has determined that it will prepare an EIS on the project. Comments previously received will be utilized during the EIS. Additional interagency and public scoping activities will be conducted. The time and place of the public scoping activities will be provided in the local news media and by notice to individuals and agencies that have expressed interest in the proposal. The draft EIS will be available for public and agency review and comment. Schedules for these activities will be distributed when available this winter.

To ensure that the full range of issues related to this proposed action are addresses and all significant issues identified, comments and suggestions are invited from all interested parties. Previous comments received by FHWA have identified a number of issues such as impacts to private landowners, water quality, wetlands, and wildlife, as well as, hillside stability, placement of fill in

the lake, tree removal, and parking along the roadway. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.
