

monetary impact of the matter. The approach of a review can include reviewing either all claims affected or a statistically valid sample of the claims.

Sample selection must include several elements. These elements are drawn from the Government sampling program known as RAT-STATS.¹ All of these elements are set forth in more detail in the Provider Self-Disclosure Protocol, but the elements are (1) Sampling unit, (2) sampling frame, (3) probe, (4) sample size, (5) random numbers, (6) sample design and (7) missing sample items. All of these sampling items should be clearly documented by the physician practice and compiled in the format set forth in the Provider Self-Disclosure Protocol. Use of the format set forth in the Provider Self-Disclosure Protocol will help physician practices to ensure that the elements of their internal audits are in conformance with OIG standards.
