

exposure. Therefore, there are no significant radiological impacts associated with the proposed action.

With regard to potential nonradiological environmental impacts, the proposed action does not involve any historic sites. It does not affect nonradiological plant effluents and has no other environmental impacts. Therefore, there are no significant nonradiological impacts associated with the proposed action.

Accordingly, the NRC staff concludes that there are no significant environmental impacts associated with the proposed action.

#### *Alternatives to the Proposed Action*

As an alternative to the proposed action, the NRC staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

#### *Alternative Use of Resources*

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for PBNP, Units 1 and 2.

#### *Agencies and Persons Consulted*

In accordance with its stated policy, on September 22, 2000, the staff consulted with the Wisconsin State official, Ms. S. Jenkins of the Public Service Commission, regarding the environmental impact of the proposed action. The State official had no comments.

#### **Finding of No Significant Impact**

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated July 14, 2000, which is available for public inspection at the Commission's Public Document Room, One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records are accessible electronically from the ADAMS Public Library component on the NRC Web site, <http://www.nrc.gov> (the Electronic Reading Room).

### **Experts' Meeting on High-Burnup Fuel Behavior Under Postulated Accident Conditions**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of meeting.

**SUMMARY:** The Nuclear Regulatory Commission will hold a meeting to complete the Phenomena Identification and Ranking Tables (PIRTs) for three accidents. PIRTs have been used at NRC since 1988, and they provide a structured way to obtain a technical understanding that is needed to address certain issues. About twenty of the world's best technical experts are participating in this activity, and the experts represent a balance between industry, universities, foreign researchers, and regulatory organizations. The current PIRT activity is addressing high-burnup fuel behavior for a PWR control rod ejection accident, a BWR failure to scram accident with power oscillations, and a loss of coolant accident for a BWR and a PWR.

**DATES:** October 26-27, 2000, 8:30 am-5:30 pm.

**ADDRESSES:** Room T10A1 (TWFN) of the Nuclear Regulatory Commission, 11545 Rockville Pike, Rockville, MD.

**SUPPLEMENTARY INFORMATION:** The meeting agenda will be posted on the NRC Web site at [www.nrc.gov/RES/meetings.htm](http://www.nrc.gov/RES/meetings.htm) by October 17, 2000. The meeting is open to the public. Attendees will need to obtain a visitor badge at the TWFN building lobby.

### **Draft Regulatory Guide; Issuance, Availability**

The Nuclear Regulatory Commission has issued for public comment a proposed revision of a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, DG-8026 (which should be mentioned in all correspondence concerning this draft guide), is titled "Health Physics Surveys in Uranium Recovery Facilities." This guide is being revised to describe health physics surveys that are acceptable to the NRC staff for protecting workers at uranium recovery facilities from radiation and the chemical toxicity of uranium while on the job. Uranium recovery facilities can include uranium mills, in situ leach facilities, ion exchange recovery facilities and certain other types of recovery facilities.

This draft guide has not received complete staff approval and does not represent an official NRC staff position.

Comments may be accompanied by relevant information or supporting data. Written comments may be submitted to the Rules and Directives Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.
