SUPPLEMENTARY INFORMATION:

Title of Collection: Evaluation of the NSF Summer Programs in Japan, the NSF Postdoctoral Research Fellowships in Japan, and the NSF-CGP Science Fellowships Program.

OMB Number: 3145-New.

Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to carry out a new information collection for one year.

Abstract: "Evaluation of the NSF Summer Programs in Japan, the NSF Postdoctoral Research Fellowships in Japan, and the NSF-CGP Science Fellowships Program."

Proposed Project: The National Science Foundation (NSF), through its East Asia and Pacific Program within the Division of International Programs,

manages a suite of programs designed to encourage and provide international research experiences for American scientists and engineers with Japanese colleagues. This suite of programs includes the NSF-CGP Science Fellowships and the Postdoctoral Research Fellowships in Japan for Ph.D.—holding scientists, and the Summer Institute in Japan and the Monbusho Summer Program for U.S. Graduate Students in Science and Engineering.

These Programs provide opportunities for improvements in cultural sensitivity and in the knowledge of foreign scientific community infrastructure. The international collaborative experiences provided through the Programs may be "catalytic" by bringing scientists from a larger global pool together in "discovery" and "connection," and by the American participants' sharing their newly-acquired knowledge, experiences and impressions with the domestic scientific community.

The purpose of the proposed program evaluation is to assess the Programs within the context of both their individually-stated objectives and the greater NSF-wide objectives. The tenth anniversary this year of the Summer Institute in Japan marks an appropriate time for a longitudinal study of program effectiveness and success, particularly with regard to the effect of an early international experience on developing research careers. The JSPS and STA Postdoctoral Fellowships and the NSF-CGP Science Fellowships have a long history (more than a decade) by which their impact on both individual careers and the scientific community can be assessed.

Use of the Information: The information will be used by NSF to assess the extent to which these approaches to developing international collaborations among young and experienced US and Asian researchers are achieving the intended programmatic goals and are consistent with the specific outcome goals defined in the context of the current NSF Strategic Plan required by the Government Performance and Results Act (GPRA) of 1993. Among NSF's outcome goals, the most relevant to its investments in developing collaborations with Asian researchers are: Promoting discoveries at and across the frontier of science and engineering; facilitating connections between discoveries and their use in service to society; developing a diverse, globally oriented workforce of scientists and engineers.

Estimate of Burden: Public reporting burden for this collection of information

is estimated to average 30 minutes per response.

Respondents: Individuals.

Estimated Number of Responses per Form: 1040.

Estimated Total Annual Burden on Respondents: 520 hours—1040

respondents at 1/2 hour per response.

Frequency of Responses: One time.

Dated: October 2, 2000.

SUMMARY: As required by the Computer Matching and Privacy Protection Act of 1988, RRB is issuing public notice of its use and intent to use, in ongoing computer matching programs, civil service benefit and payment information obtained from the Office of Personnel Management (OPM).

The purpose of this notice is to advise individuals applying for or receiving benefits under the Railroad Retirement Act of the use made by RRB of this information obtained from OPM by means of a computer match.

ADDRESSES: Interested parties may comment on this publication by writing to Ms. Beatrice Ezerski, Secretary to the

Board, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092.

FOR FURTHER INFORMATION CONTACT: Mr. LeRoy Blommaert, Privacy Act Officer, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092, telephone number (312) 751–4548.

SUPPLEMENTARY INFORMATION: The Computer Matching and Privacy Protection Act of 1988, Pub. L. 100–503, requires a Federal agency participating in a computer matching program to publish a notice regarding the establishment of a matching program.

Name of Participating Agencies

Office of Personnel Management and Railroad Retirement Board.

Purpose of the Match

The purpose of the match is to enable the RRM to (1) Identify affected RRB annuitants who are in receipt of a Federal public pension benefit but who have not reported receipt of this benefit to the RRB and (2) receive needed Federal public pension benefit information for affected RRB annuitants more timely and accurately. Previously the RRB relied on the affected annuitant to report adjustments in the amounts of such public pension benefits.

Authority for Conducting the Match

Sections 3(a)(1), 4(a)(1) and 4(f)(1) of the Railroad Retirement Act require that the RRB reduce the Railroad Retirement benefits of certain beneficiaries entitled to Railroad Retirement employee and/or spouse/widow benefits who are also entitled to a government pension based on their own noncovered earnings. This reduction is referred to as Public Service Pension offset. Section 224 of the Social Security Act provides for the reduction of disability benefits when the disabled worker is also entitled to a public disability benefit (PDB). This reduction is referred to as PDB offset. A civil service disability benefit is considered a PDB. Section 224(h)(1) requires any Federal agency to provide RRB with information in its possession that RRB may require for the purposes of making a timely determination of the amount of reduction under section 224 of the Social Security Act. Pursuant to 5 U.S.C. Section 552a(b)(3) OPM has established routine uses to disclose the subject information to RRB.
