SUPPLEMENTARY INFORMATION:

Background

EPA and ASTSWMO formed a State/EPA Steering Committee in 1996 to jointly develop voluntary facility guidance regarding the management of industrial nonhazardous waste in new land-based disposal units. The purpose of the guidance document is to provide a guide to facility managers, State and Tribal environmental staff, and members of the general public so that safe industrial waste management can be achieved. The current draft Guide addresses such topics as appropriate controls for ground-water protection, liner designs, air emissions, run-on/run-off, public participation, daily operating practices, monitoring and corrective action, and closure and post-closure considerations. In addition, the draft Guide addresses such topics as waste characterization, pollution prevention, and building partnerships.

The draft Guide and the CD-ROM, on which the Guide and modeling tools were placed, were noticed in the *FR* in June 1999. The public comment period ended in January 2000. The State/EPA Steering Committee will continue to convene this Stakeholders Focus Group in order to obtain recommendations from those individuals who represent a broad spectrum of public interest groups and affected industries. All recommendations from Focus Group participants are forwarded to the State/EPA Steering Committee for consideration, as the Stakeholders Focus Group does not strive for a consensus.

Copies of the minutes of the past six Stakeholder Focus Group meetings have previously been made available through the original docket for this project (F-96-INHA-FFFFF) at the RCRA

Information Center. The past six Focus Group meetings were held on April 11–12, 1996, September 11–12, 1996, February 19–20, 1997, May 20–21, 1997, October 8–9, 1997, and March 18–19, 1998.
