## FEDERAL COMMUNICATIONS COMMISSION

[GN Docket No. 00-185; FCC 00-355]

### Inquiry Concerning High-Speed Access to the Internet Over Cable and Other Facilities

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice of inquiry.

**SUMMARY:** On September 28, 2000, the Commission released a Notice of Inquiry in this docket seeking comment on issues surrounding high-speed access to the Internet provided to subscribers using cable television infrastructure, or so-called "cable modem services." The Commission inquires into what regulatory treatment, if any, should apply to cable modem services and the cable modem platform used in providing such services, and what impact such treatment will have on other providers of high-speed services. The underlying purpose of issuing this Notice of Inquiry is to create a national legal and policy framework for cable modem service that will foster competitive deployment of high-speed services by all providers and instill a degree of regulatory stability that will encourage investment in all high-speed networks. In this proceeding, the Commission will examine whether to continue its present market-based approach and whether and how to introduce a national policy framework for regulating high-speed services.

**DATES:** Comment must be filed on or before November 27, 2000. Reply comment must be filed on or before December 26, 2000.

**ADDRESSES:** Parties who choose to file comments or reply comments should file an original and four copies of each filing with the Commission's Secretary, Magalie Roman Salas, Office of the Secretary, Federal Communications Commission, Room TW-B204, 445 12th St. SW., Washington, DC 20554. #### Synopsis of the Notice of Inquiry

1. The purpose of the Notice of Inquiry is to develop a factual record regarding the high-speed services provided by cable operators and the type of access sought by unaffiliated Internet Service Providers (ISPs), as well as the extent to which such access is necessary to benefit consumers or otherwise achieve desired policy goals. The Commission invites comments on alternative approaches to classifying cable modem service and the cable modem platform under the Communications Act and the implications of adopting each such classification.

2. The Commission seeks comment on various issues related to "open access," including how to define the concept, what initiatives have taken place to date, and how market-based and regulatory approaches may affect the availability of high-speed services. The Notice of Inquiry asks whether achieving open access is a desirable policy goal and, if so, whether the Commission's existing policy of regulatory restraint will adequately achieve open access or whether the Commission should adopt a regulatory, or prescriptive, approach.

3. It also inquires whether the Commission's legal and policy framework for cable modem service or the cable modem platform should apply to all providers of high-speed services. The Notice of Inquiry invites comment on technical and operations concerns associated with achieving open access, and asks whether the Commission should pursue any further course of action, such as continuing its current approach or exercising its rulemaking or forbearance authority.
