

participation could be increased among college-bound students, potential ASVAB internet administration, and whether ASVAB personnel negatively affect participation. For nonparticipating schools, we will also ask why they elect not to use the ASVAB program, and to what extent logistical problems, anti-military sentiment, poor fit with school goals, and poor fit with student goals have influenced their decision not to use the ASVAB program. Results will be merged with data collected as part of the NCES School and Staffing Survey to provide a more complete understanding of the reasons schools elect to participate in the CEP. The results of this study will be reported internally to the ASVAB Career Exploration Program and to the appropriate DoD committees and agencies, as well as to the Congressionally-mandated oversight committee. It is anticipated that the

results will be of primary interest to those involved in the marketing of the ASVAB program, as well as members of the recruiting community. Only aggregated data will be reported; no individual or school names will be included in the results.
