

alternative methods to increase the response rates, it is critical that this incentive experiment be conducted as quickly as possible so that the findings can be considered in plans for the 2002 NHSDA (or sooner, if possible).

Households included in this experiment will be selected randomly from among the households already selected for the 2001 NHSDA. Once assigned to the experiment, households will be assigned to one of three treatment groups: a \$40 incentive, a \$20 incentive, or no incentive.

Respondents who take part in the incentive experiment will complete exactly the same questionnaire as that used for the main 2001 NHSDA. The sample size for the incentive experiment will be sufficient to assess the effectiveness of the incentive as described above. A sample of approximately 2,500 completed interviews is planned. No additional burden will be realized for this experiment beyond what was originally calculated for the main 2001 NHSDA data collection activities because the experiment will be conducted among households selected for the national survey.

Written comments and recommendations concerning the proposed information collection should be sent within two weeks of this notice to: Stuart Shapiro, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: October 10, 2000.

Fish and Wildlife Service

Availability of a Habitat Conservation Plan and Receipt of an Application for an Incidental Take Permit for Cabin Timber Harvest Plan, Napa County, CA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: This notice advises the public that the California Baptist Foundation (CBF) has applied to the Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended (Act). The proposed permit would authorize the incidental take of one pair of northern spotted owls (*Strix occidentalis caurina*), federally listed as a threatened species, that may result due to habitat modification within the nest stand. The permit would be in effect for 5 years.

The Service announces the receipt of CBF's incidental take permit application and the availability of the proposed Cabin Habitat Conservation Plan (Plan), for public comment. The Plan fully describes the proposed project and the measures CBF will undertake to minimize and mitigate project impacts to the northern spotted owl. The Service has determined that the Cabin Timber Harvest Plan (THP)/Plan qualifies as a "Low Effect" Plan as defined by the Service's Habitat Conservation Planning Handbook (November 1996). The Service has further determined that approval of the Plan qualifies as a categorical exclusion under the National Environmental Policy Act, as provided by the Department of Interior Manual (516 DM2, Appendix 1 and 516 DM 6, Appendix 1). The basis for this
