Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) is providing an opportunity for public comment on proposed data collection projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Assistant Reports Clearance Officer at 404-639-7090.

Comments are invited on: (i) Whether the proposed collection of information is necessary for the proper performance of the functions of the CDC, including whether the information shall have a practical utility; (ii) the accuracy of the agency's estimate of the burden of the proposed collection of information; (iii) ways to enhance the quality, utility, and clarity of the information to be collected; and (iv) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, Georgia 30333. Written comments should be received within 60 days of this notice.

Proposed Project

Information Collection to Establish Community Assistance Panels (CAPs) OMB No.0923-0007—Extension—The Agency for Toxic Substances and Disease Registry (ATSDR) is mandated pursuant to the 1980 Comprehensive Environmental Response Compensation and Liability Act (CERCLA), and its 1986 Amendments, The Superfund Amendments and Reauthorization Act (SARA), to prevent or mitigate adverse human health effects and diminished quality of life resulting from the exposure to hazardous substances into

the environment. To facilitate this effort, ATSDR seeks the cooperation of the community being evaluated through direct communication and interaction. Direct community involvement is required to conduct a comprehensive scientific study and to effectively disseminate specific health information

in a timely manner. Also, this direct interaction fosters a clear understanding of health issues that the community considers to be of importance and establishes credibility for the agency. The Community Assistance Panel nominations forms are completed by individuals in the community to

nominate themselves or others for participation on these panels. This request is for a 3-year extension of the current OMB approval of the Community Assistance Panel nominations form. There is no cost to respondents.

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639–7090. Send written comments to CDC, Desk Officer; Human

Resources and Housing Branch, New Executive Office Building, Room 10235; Washington, DC 20503. Written comments should be received within 30 days of this notice.

Proposed Project

Youth Environmental Risk Perception Survey—New—Agency for Toxic Substances and Disease Registry (ATSDR). In 1996, the Agency for Toxic Substances and Disease Registry (ATSDR) launched a child health initiative to investigate knowledge and awareness of environmental hazards among children and youth. ATSDR is designing a new study, Risk Perceptions Among Youth of Environmental Hazards, to evaluate whether an educational intervention influences risk perceptions and knowledge of environmental toxins among middle school-aged students in a large metropolitan area. The results of this study will shed light on the ways young people learn about and use new information on environmental hazards. The results of this study will also be used to develop targeted environmental

health education campaigns and improve communication strategies aimed at young people, and inform and guide ATSDR partners who may be planning similar educational interventions.

An educational intervention will be designed and implemented in a school-based setting to see if and how three communication variables influence young people’s knowledge and behavior of environmental hazards. The key variables in this study are the source of the message, the contaminant, and the individual’s perception of risk. A study population of 360 male and female students will be randomly selected from 7th and 8th grade science classes in a large metropolitan school district. Each study participant will complete two written surveys (*e.g.*, a pre-test and post-test) administered prior to and immediately after listening to risk and hazard information. The results will be evaluated to determine the impact of different types and sources of information on the risk perceptions of participants. The estimated annualized burden is 90 hours.
