

Tribal nations, state and local governments, and private citizens.

The Draft Study does not:

- Serve as a National Environmental Policy Act (NEPA) document or its functional equivalent;
- Identify or address site-specific issues, except as examples in the context of presenting national issues; or
- Address issues specific to nuclear stockpile stewardship, other activities related to national security, or the Central Internet Database required by the settlement agreement.

#### Study Development Process

The terms of the settlement agreement stipulate that DOE follow the President's Council on Environmental Quality (CEQ) procedures for public scoping, 40 CFR 1501.7(a)(1)–(2) for this study, even though it is not a NEPA document or its functional equivalent. Therefore, DOE conducted a scoping process during October 1999–February 2000 to gather comments on the scope of the Draft Study. The scoping period was initially intended to run from October 1999 to January 2000, but was extended by request to February 2000. The scoping process provided DOE with input about the topics and issues that should be included in the Draft Study, within the general parameters established by the settlement agreement. DOE developed the overall scope and issues that are addressed in the Draft Study based on comments received through the scoping process, ongoing work on long-term stewardship being conducted by DOE and non-DOE organizations, and requirements of the settlement agreement. DOE is soliciting comments on the Draft Study during a public comment period that begins on the date of publication of this notice and ends on December 15, 2000. Similarly, a public hearing will be held to receive oral and written comments from the public on the Draft Study. Comments received during the public comment period will be used by DOE to complete the final study. DOE's responses to comments received during the public comment period will be presented in a public comment summary document to be issued as part of the final study.

#### Availability of the Draft Study and Related Information

DOE released a background document, From Cleanup to Stewardship, a Companion Report to "Paths to Closure" and Background Information to Support the Scoping Process Required for the 1998 PEIS Settlement Study in October 1999. In producing the background document and the Draft Study, DOE used the same

data set used to develop the 1998 Accelerating Cleanup: Paths to Closure report. DOE used this information to identify sites where contaminated facilities, water, soil, and/or engineered units would likely remain after cleanup is complete to estimate the scope of long-term stewardship activities. Both the Draft Study on long-term stewardship and the background document are the best available information sources to date on the issue of DOE's long-term stewardship responsibilities. Copies of the Draft Study and the background document or other related information can be obtained by contacting:

- The Internet Web Site at [www.em.doe.gov/lts](http://www.em.doe.gov/lts), which contains information on long-term stewardship related issues produced by DOE and outside sources.
