RSPA acknowledges that it may take more than 1 minute 30 seconds to prepare a number of shipping papers. However, other shipping papers can be prepared more quickly by using data programs, especially for shippers who continually ship the same hazardous materials.

Transportation Requirements.

OMB Control Number: 2137-0510.

Type of Request: Extension of a currently approved collection.

Abstract: This information collection consolidates and describes the information collection provisions in the HMR (49 CFR parts 171-180) involving the transportation of radioactive materials in commerce. Information collection requirements for RAM include: shipper notification to consignees of the dates of shipment of RAM; expected arrival; special loading/unloading instructions; verification that shippers using foreign-made packages hold a foreign competent authority certificate and verification that the terms of the certificate are being followed for RAM shipments being made into this country; and specific handling instructions from shippers to carriers for fissile RAM, bulk shipments of low specific activity RAM and packages of RAM which emit high levels of external radiation. These information collection requirements help to establish that proper packages are used for the type of radioactive material being transported; external radiation levels do not exceed prescribed limits; packages are handled appropriately and delivered in a timely manner, so as to ensure the safety of the

general public, transport workers, and emergency responders.

Affected Public: Shippers and carriers of radioactive materials in commerce.

Estimated Number of Respondents: 3,807.

Estimated Number of Responses: 21,319.

Annual Estimated Burden Hours: 14,480.

Frequency of Collection: Periodically.

ADDRESSES: Send comments regarding the burden estimate, including suggestions for reducing the burden, to Office of Management and Budget, Attention: Desk Officer for RSPA, 725 17th Street, NW., Washington, DC 20503.
