II. Did EPA Conditionally Approve the Application?

A conditional registration may be granted under section 3(c)(7)(C) of FIFRA for a new active ingredient where certain data are lacking, on condition that such data are received by the end of the conditional registration period and do not meet or exceed the risk criteria set forth in 40 CFR 154.7; that use of the pesticide during the conditional registration period will not cause unreasonable adverse effects; and that use of the pesticide is in the public interest. The Agency has considered the available data on the risks associated with the proposed use of Silver Sodium Hydrogen Zirconium Phosphate, and information on social, economic, and environmental benefits to be derived from such use. Specifically, the Agency has considered the nature and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of Silver Sodium Hydrogen Zirconium Phosphate during the period of conditional registration will not cause any unreasonable adverse effect on the environment, and that use of the pesticide is, in the public interest.

Consistent with section 3(c)(7)(C) of FIFRA, the Agency has determined that these conditional registrations are in the public interest. Use of the pesticides are of significance to the user community, and appropriate labeling, use directions,

and other measures have been taken to ensure that use of the pesticides will not result in unreasonable adverse effects to man and the environment.

III. Conditionally Approved Registration

Application approved but not published. Milliken Chemical, P.O. Box 1927, Spartanburg, SC 29304, submitted an application to EPA to register the pesticide product Antimicrobial AlphaSan RC 5000 (EPA File Symbol 11631-E) containing the active ingredient silver sodium hydrogen zirconium phosphate at 99.9%. However, since the notice of receipt of the application to register the product as required by section 3(c)(4) of FIFRA, as amended, did not publish in the **Federal Register**, interested parties may submit comments on or before December 27, 2000 for this product.

EPA conditionally approved the application on May 22, 2000, as Antimicrobial AphaSan RC 5000 for use as a powder, liquid, or solid dispersion into, or on the surface of various plastics, fibers, coatings, adhesives, sealants and building materials. These materials are used to manufacture a wide variety of nonfood contact, finished treated articles (EPA Registration Number 11631-2).
