**II. Receipt of Requests to Cancel and Amend Registrations to Delete Uses**

*A. Background*

In a memorandum of agreement (Agreement) effective June 7, 2000, EPA and a number of registrants of pesticide products containing chlorpyrifos agreed to several voluntary measures that will reduce the potential exposure to children associated with chlorpyrifos containing products. Shortly thereafter, EPA and several other pesticide registrants of manufacturing-use products containing chlorpyrifos signed ancillary agreements in which the parties agreed to comply with the terms of the June 7, 2000, agreement. EPA initiated the negotiations with registrants after finding chlorpyrifos, as currently registered, was an exposure risk especially to children. As part of the Agreement, the signatory registrants that hold the pesticide registrations of manufacturing-use pesticide products containing chlorpyrifos have asked EPA to cancel their registrations for these products. In addition, these companies asked EPA to cancel or amend their registrations for end-use products containing chlorpyrifos. Pursuant to section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA announced the Agency's receipt of these requests from the registrants on September 20, 2000 (65 FR 56886). With respect to the registration amendments, the companies have asked EPA to amend end-use product registrations to delete the following uses: all termite control uses (these will be phased out); all residential uses (except for ant and roach baits in child resistant packaging (CRP) and fire ant mound drenches for public health purposes by licensed applicators and mosquito control for public health purposes by public health agencies); all indoor non-residential uses (except ship holds, industrial plants, manufacturing plants, food processing plants, containerized baits in CRP, and processed wood products treated during the manufacturing process at the manufacturing site or at

the mill); all outdoor non-residential sites (except golf courses, road medians, industrial plant sites, fence posts, utility poles, railroad ties, landscape timbers, logs, pallets, wooden containers, poles, posts, processed wood products, manhole covers and underground utility cable and conduits; and fire ant mound drenches for public health purposes by licensed applicators and mosquito control for public health purposes by public health agencies); and use on tomatoes and post-bloom apple trees. With respect to the registration cancellations, the companies have submitted replacement applications for registration with new labeling that would also eliminate all of these uses. In addition, the companies agreed to limit the maximum chlorpyrifos end-use dilution to 0.5% active ingredient (a.i.) for termiticide uses that will be phased out, limit the maximum label application rate for outdoor non-residential use on golf courses, road medians, and industrial plant sites to 1 lb/a.i. per acre, and either classify all new/amended chlorpyrifos products (except baits in CRP) as Restricted Use or package the products in large containers, depending on the formulation type, to ensure that remaining chlorpyrifos products are not available to homeowners. In return, EPA stated that with this Agreement, it had no current intention to initiate any cancellation or suspension proceedings under section 6(b) or 6(c) of FIFRA with respect to the issues addressed in the Agreement.

On September 20, 2000, (65 FR 56886) (FRL-6743-7), EPA published in the **Federal Register** a notice of the Agency's receipt of amendments and cancellations for manufacturing-use products and associated end-use products for signatories of the Memorandum of Agreement that was signed on June 7, 2000 and subsequent ancillary agreements. A copy of the Memorandum of Agreement that was signed on June 7, 2000 is located in docket control number OPP-34203D.

*B. Requests for Voluntary Cancellation of Manufacturing-Use Products*

Pursuant to the Agreement and FIFRA section 6(f)(1)(A), the registrants have submitted requests for voluntary cancellation of registrations for their manufacturing-use products. The registrations for which cancellations were requested are identified in the following Table 1.

In the Federal Register notice published on September 20, 2000, EPA

requested public comment on the voluntary cancellation and use deletion requests, and provided a 30-day comment period. The registrants requested that the Administrator waive the 180-day period provided under FIFRA section 6(f)(1)(C). One public comment was submitted to the docket in response to EPA's request for comments. This comment was a generic comment on the overall organophosphate process focusing on the development of a new process for review of the organophosphate pesticides that did not relate to this action specifically.

*C. Requests for Voluntary Cancellation of End-Use Products*

In addition to requesting voluntary cancellation of manufacturing-use products, several registrants have submitted requests for voluntary cancellation of some of their registrations for end-use pesticide products containing chlorpyrifos. The end-use registrations for which cancellation was requested are identified in the following Table 2.

In the **Federal Register** notice published on September 20, 2000, EPA requested public comment on the voluntary cancellation and use deletion requests, and provided a 30-day comment period. The registrants requested that the Administrator waive the 180-day period provided under FIFRA section 6(f)(1)(C).

### III. Cancellation Order

Pursuant to section 6(f) of FIFRA, EPA is approving the requested use deletions and the requested registration cancellations. Accordingly, the Agency orders that the registrations identified in Table 3 are hereby amended to delete the following uses: All post-construction termite control uses, except spot and local treatment ( use of such products for spot and local treatment will be prohibited after December 31, 2002 by product labeling); all other termite control uses, effective December 31, 2004 (unless EPA has made a decision prior to that date that preconstruction use may continue); all residential uses (except for ant and roach baits in child resistant packaging (CRP) and fire ant mound drenches for public health purposes by licensed applicators and mosquito control for public health purposes by public health agencies); all indoor non-residential, non-agricultural uses (except ship holds, industrial plants, manufacturing plants, food processing plants, containerized baits in CRP, and processed wood products treated during the manufacturing process at the manufacturing site or at the mill); all outdoor non-residential, non-agricultural sites (except golf courses, road medians, industrial plant sites, fence posts, utility poles, railroad ties, landscape timbers, logs, pallets, wooden containers, poles, posts, processed wood products, manhole covers and underground utility cable and conduits; and fire ant mound drenches for public health purposes by licensed applicators and mosquito control for public health purposes by public health agencies); and use on tomatoes and post-bloom apple trees (except for tree trunk use). The Agency also orders that the registrations identified in Tables 1 and 2 are hereby canceled. Any distribution, sale, or use of existing stocks of the products identified in Tables 1–3 in a manner inconsistent with the terms of this Order or the Existing Stock Provisions in Unit IV. of this document will be considered a violation of section 12(a)(2)(K) of FIFRA and/or section 12(a)(1)(A) of FIFRA.

### IV. Existing Stocks Provisions

For purposes of this Order, the term existing stocks is defined, pursuant to EPA's existing stocks policy (56 FR 29362, June 26, 1991), as those stocks of a registered pesticide product which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the amendment or cancellation.

#### A. Manufacturing-Use Products

1. *Distribution or sale*. The distribution or sale of existing stocks of any manufacturing-use product identified in Table 1 will not be lawful under FIFRA as of December 27, 2000, except for the purposes of returns for relabeling consistent with the June 7, 2000 Memorandum of Agreement, shipping such stocks for export consistent with the requirements of section 17 of FIFRA, or for proper disposal.

2. *Use for producing other manufacturing-use products*. The use of existing stocks of any manufacturing-use product identified in Table 1 for formulation into any other manufacturing-use product will not be lawful under FIFRA as of December 1, 2000 unless such product bears an EPA-approved label that is consistent with the provisions of the Agreement.

3. *Use for producing end-use products—(i) Restricted use and package size limitations*. (a) The use of existing stocks of any manufacturing-use product identified in Table 1 for formulation into any end-use product that is an emulsifiable concentrate (EC) will not be lawful under FIFRA as of December 1, 2000, unless the end-use product is labeled for restricted use;

(b) The use of existing stocks of any manufacturing-use product identified in Table 1 for formulation into any end-use product labeled for any agricultural use (other than cattle ear tags) and that is not an EC, will not be lawful under FIFRA as of December 1, 2000, unless the product is either labeled for restricted use or packaged in containers no smaller than 15 gallons of a liquid formulation, 50 pounds of a granular formulation, or 25 pounds of any other dry formulation;

(c) The use of existing stocks of any manufacturing-use product identified in Table 1 for formulation into any end-use product labeled solely for non-agricultural uses (other than containerized baits in Child Resistant Packaging (CRP)) and that is not an EC, will not be lawful under FIFRA as of December 1, 2000, unless the product is either labeled for restricted use or

packaged in containers no smaller than 15 gallons of a liquid formulation or 25 pounds of a dry formulation.

(ii) *Use in products labeled for use on tomatoes or use on apple trees post bloom.* The use of existing stocks of any manufacturing-use product identified in Table 1 for formulation into end-use products bearing instructions for use on tomatoes or use on apple trees following bloom (except for tree trunk use) will not be lawful under FIFRA as of December 1, 2000.

(iii) *Use in products labeled for other end-uses.* The use of existing stocks of any manufacturing-use product identified in Table 1 for formulation into any end-use product bearing instructions for any of the following uses will not be lawful under FIFRA after December 1, 2000:

(a) All termite control uses, unless the end-use product bears directions for use of a maximum 0.5% chlorpyrifos end-use dilution;

(b) Post-construction termite control, except for spot and local termite treatment, provided the label of the end-use product states that the product may not be used for spot and local treatment after December 31, 2002;

(c) Indoor residential, except for containerized baits in CRP;

(d) Indoor non-residential, except for containerized baits in CRP and products with formulations other than EC that bear labeling solely for one or more of the following uses: Warehouses, ship holds, railroad boxcars, industrial plants, manufacturing plants, food processing plants, or processed wood products treated during the manufacturing process at the manufacturing site or at the mill;

(e) Outdoor residential, except for products bearing labeling solely for one or more of the following public health uses: individual fire ant mound treatment by licensed applicators or mosquito control by public health agencies;

(f) Outdoor non-residential, non-agricultural except for products that bear labeling solely for one or more of the following uses: golf courses, road medians, and industrial plant sites, provided the maximum label application rate does not exceed 1lb./ai per acre; mosquito control for public health purposes by public health agencies; individual fire ant mound treatment for public health purposes by licensed applicators; and fence posts, utility poles, railroad ties, landscape timbers, logs, pallets, wooden containers, poles, posts, processed wood products, manhole covers and underground utility cable and conduits.

(iv) *Final use date for any manufacturing-use product labeled for termite control.* The use of existing stocks of any manufacturing-use product identified in Table 1 for formulation into any end-use product labeled for termite control will not be lawful under FIFRA after December 31, 2004, except that EPA will permit the continued use for the manufacture of end-use products labeled solely for pre-construction termite control if EPA has issued a written determination that the pre-construction use may continue consistent with the requirements of FIFRA.

4. *All other use.* Any use of existing stocks of a canceled manufacturing-use product identified in Table 1 that is not otherwise limited by this order may continue until such stocks are exhausted provided such use is in accordance with the existing label of that product.

#### B. End-Use Products

1. *Distribution, sale of products bearing instructions for use on tomatoes or apple trees post bloom.* The distribution or sale of existing stocks by any person of any product listed in Table 2 or 3 that bears instructions for post-bloom application to apple trees (other than tree trunk use) or use on tomatoes will not be lawful under FIFRA after December 31, 2000, except for the purposes of returns for relabeling consistent with the June 7, 2000 Memorandum of Agreement, shipping such stocks for export consistent with the requirements of section 17 of FIFRA, or proper disposal. Any use of such products for post-bloom application to apple trees (other than tree trunk use) or tomatoes will not be lawful after December 31, 2000. All other use of such products may continue until stocks are exhausted, provided such use is in accordance with the existing labeling of that product.

2. *Distribution or sale by registrants of products bearing other uses—* (i) *Restricted use and package size limitations.* Except for the purposes of returns for relabeling consistent with the June 7, 2000 Memorandum of Agreement, shipping for export consistent with the requirements of section 17 of FIFRA, or proper disposal:

(b) The distribution or sale by registrants of existing stocks of any product listed in Table 2 or 3 labeled for any agricultural use and that is not an

EC, will not be lawful under FIFRA after February 1, 2001, unless the product is either labeled for restricted use or packaged in containers no smaller than 15 gallons of a liquid formulation, 50 pounds of a granular formulation, or 25 pounds of any other dry formulation;

(c) The distribution or sale by registrants of existing stocks of any product listed in Table 2 or 3 labeled solely for non-agricultural uses (other than containerized baits in CRP) and that is not an EC, will not be lawful under FIFRA after February 1, 2001, unless the product is either labeled for restricted use or packaged in containers no smaller than 15 gallons of a liquid formulation or 25 pounds of a dry formulation.
