(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemptions does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is

not dispositive of whether the transaction is in fact a prohibited transaction; and

3. The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

NUCLEAR REGULATORY COMMISSION**[Docket No. 50-397]****Energy Northwest; WNP-2; Environmental Assessment and Finding of No Significant Impact**

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an amendment to Facility Operating License No. NPF-21, issued to Energy Northwest (the licensee), for operation of WNP-2 located in Benton County, Washington.

Environmental Assessment*Identification of the Proposed Action*

The proposed action would change the name of the facility from WNP-2 to Columbia Generating Station in all applicable locations of the Facility Operating License including the licensee's technical specifications (TS). In addition, the proposed action would make editorial changes to TS Figure 4.1-1, "Site Area Boundary" modifying or deleting text associated with references to WNP-2. TS Figure 4.1-1 also identifies a building as both the "Plant Support Facility" and the "Emergency Operations Facility." The licensee has proposed a change to delete the name "Plant Support Facility" from the figure.

The proposed action is in accordance with the licensee's application for amendment dated October 12, 2000.

The Need for the Proposed Action

The proposed action is needed to change the operating license to accurately reflect the name change of the facility from WNP-2 to Columbia Generating Station and to identify the building in TS Figure 4.1-1 with only the name "Emergency Operations Facility."

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that the name change is administrative in nature and will not affect the operation of WNP-2.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regards to potential nonradiological impacts, the proposed action does not involve any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the
