BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP99-94-003]

Florida Gas Transmission Company; Notice of Intent to Prepare an Environmental Assessment for the Proposed Modified Tampa South Lateral Extension and Request for Comments on Environmental Issues

December 4, 2000.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the proposed modified route of the Tampa South Lateral Extension (TSLE) involving construction and operation of facilities by Florida Gas Transmission Company (FGT) in Hillsborough County, Florida.¹ Specifically FGT proposes to modify its certificate in Docket No. CP99-94-000. The proposed facilities would consist of about 6.2 miles of 6- and 8-inch-diameter pipeline. This EA will be used by the Commission in its decision-making process to determine whether the proposed modified route for TSLE is preferable to the certificated route.

If you are a landowner receiving this notice, you may be contacted by a pipeline company representative about the acquisition of an easement to construct, operate and maintain the proposed facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need

¹ FGT's application was filed with the Commission under Section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.
