#### Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Approval of VOC and NO<sub>x</sub> RACT Determinations for Individual Sources

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Direct final rule.

**SUMMARY:** EPA is taking direct final action on revisions to the Commonwealth of Pennsylvania's State Implementation Plan (SIP). The revisions establish and require reasonably available control technology (RACT) for 56 major sources of volatile organic compounds (VOC) and nitrogen oxides (NO<sub>x</sub>). EPA is approving these revisions to establish RACT requirements in the SIP in accordance with the Clean Air Act.

**DATES:** This rule is effective on February 13, 2001 without further notice, unless EPA receives adverse written comment by January 16, 2001. If EPA receives such comments, it will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

**ADDRESSES:** Written comments should be mailed to Makeba Morris, Chief, Permits and Technical Assessment Branch, Air Protection Division, Mailcode 3AP11, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103; the Air and Radiation Docket and Information Center, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460; and the Pennsylvania Department of Environmental Protection, Bureau of Air Quality Control, P.O. Box 8468, 400 Market Street, Harrisburg, Pennsylvania 17105.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

On September 20, 1995, December 8, 1995, January 10, 1996, March 21, 1996, April 16, 1996, May 2, 1996, June 10, 1996, September 13, 1996, January 21, 1997, July 2, 1997, November 4, 1997, December 31, 1997, March 24, 1998, April 20, 1998, May 29, 1998, July 24, 1998, December 7, 1998, February 2, 1999, March 3, 1999, April 9, 1999, and April 20, 1999, the Commonwealth of Pennsylvania (the Commonwealth) submitted formal revisions to its SIP to establish RACT for major sources of VOCs and NO<sub>x</sub>. EPA is approving the Commonwealth's RACT submittals for

56 of these sources in this rulemaking action. EPA will address the Commonwealth's submittals for other sources in later rulemaking actions. The Commonwealth's submittals consist of plan approvals, operating permits, and/or compliance permits which contain the RACT requirements for each source. In accordance with Pennsylvania's SIP revision request, EPA is approving only the RACT related requirements contained in these plan approvals, operating permits, and/or compliance permits.

Pursuant to sections 182(b)(2) and 182(f) of the Clean Air Act (CAA), Pennsylvania is required to implement RACT for all major VOC and NO<sub>x</sub> sources. The major source size is determined by its location, the classification of that area and whether it is located in the ozone transport region (OTR), which is established by the CAA. The Pennsylvania portion of the Philadelphia-Wilmington-Trenton ozone nonattainment area (the Philadelphia area) consists of Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties and is classified as severe. Under section 184 of the CAA, at a minimum, moderate ozone nonattainment area requirements (including RACT as specified in sections 182(b)(2) and 182(f)) apply throughout the OTR. The entire Commonwealth of Pennsylvania is in the OTR. Therefore, RACT is applicable statewide in Pennsylvania.

##### II. Summary of the SIP Revision

The details of the RACT requirements for each source are discussed in the technical support documents (TSDs) found in the docket for this rulemaking action and will not be reiterated in this document. Briefly, EPA is approving revisions to the Pennsylvania SIP establishing and requiring VOC and/or NO<sub>x</sub> RACT for 56 major sources. The RACT determinations and requirements are included in plan approvals, operating permits and/or compliance permits. Several of the plan approvals, operating permits, and/or compliance permits also contain provisions which are not relevant to the requirements for RACT. These provisions are not part of Pennsylvania's SIP revision requests to EPA.

##### RACT Determinations

The following table identifies the individual plan approvals, operating permits and/or compliance permits EPA is approving. The specific emission limitations and other RACT requirements for these sources are summarized in the accompanying TSDs, which are available upon further request

from the EPA Region III office listed in the ADDRESSES section of this document.

EPA is publishing this rule without prior proposal because we view this as a noncontroversial amendment and anticipate no adverse comment. However, in the "Proposed Rules" section of today's **Federal Register**, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision if adverse comments are filed. This direct final rule will be effective on February 13, 2001 without further notice unless we receive adverse comment by January 16, 2001. If EPA receives adverse comment, EPA will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. EPA will address all public comments in a subsequent final rule based on the proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting must do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

### III. Final Action

EPA is approving revisions to the Commonwealth of Pennsylvania's SIP submitted by the Department of Environmental protection which establish and require RACT for 56 major sources of NO<sub>x</sub> and VOC located in Pennsylvania.

### IV. Administrative Requirements

#### A. General Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. This action merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104-4). For the same reason, this rule also does not significantly or uniquely affect the communities of tribal governments, as

specified by Executive Order 13084 (63 FR 27655, May 10, 1998). This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

#### B. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 804 exempts from section 801 the following

types of rules: (1) Rules of particular applicability; (2) rules relating to agency management or personnel; and (3) rules of agency organization, procedure, or practice that do not substantially affect the rights or obligations of non-agency parties. 5 U.S.C. 804(3). EPA is not required to submit a rule report regarding today's action under section 801 because this is a rule of particular applicability establishing source-specific requirements for 56 named sources.

#### C. Petitions for Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 13, 2001. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action approving Pennsylvania's source-specific RACT requirements for 56 sources may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)
